Student Study Guide**

2006-11-19 PREFACE The
Commander, United States

Special Operations Command (USSOCOM) directed that all Special Operational Forces (SOF) Medics be trained to a single, interoperable standard. He directed that the USSOCOM's Advanced Tactical Practitioner's (ATP) Critical Task List (CTL) be implemented into all SOF enlisted medical training as a minimum standard. Upon completion of SOF medical training, all SOF students are required to sit and successfully pass the USSOCOM Advanced Tactical Practitioner's Certification Examination as official recognition and proof of the student's knowledge of the CTL medical requirements. This study guide reflects the hybrid nature of the USSOCOM certification examination. Where applicable, SOF medical requirements and standards have been merged with the DOT based curriculum. The DOT/Civilian standards of care are always applicable to the military but there may be times when it is difficult to achieve. Many questions on the examination will be

appropriate in either setting. Where so, there has been an attempt both on the examination and in this study guide, to differentiate the standard of care in the pertinent setting. The ATP student will find that like the Department of Transportation's Curriculum and the National Registry's Certification program and any other "Medical Certification" process; most of the material covered within the pages of this study guide will be covered during the student's formal phase of instruction. However, some of it may not. The student must recognize that not all subject material can be taught in a formal setting. It is the ATP student's responsibility to use this study guide to complement their formal instruction in preparation to successfully pass the USSOCOM ATP Certification Examination. CONTENTS

Airline Transport Pilot Oral Exam Guide Michael D. Hayes 2020
The fifth edition of the Airline Transport Pilot Oral Exam Guide has been updated with new references and new and revised questions to reflect the latest regulations and Airman Certification Standards. Written to help prepare applicants for their oral exams with FAA examiners. Using a question-and-answer format, each Oral Exam Guide lists the questions most likely to be asked by examiners and provides succinct, ready responses. An

excellent study tool for pilots gearing up for their checkride, airman check, or interview. Flight instructors find these an indispensable part of the test preparation process, teaching ATP candidates how to exhibit subject mastery and confidence when under the examiner's scrutiny. All the subjects an ATP candidate will be tested on during checkrides, career interviews, and aircraft transition rides are covered. Chapters are dedicated to turbine aircraft theory, performance and limitations, airline operational procedures, aeronautical decision making (ADM) and crew resource management (CRM), regulations, and instrument procedures. Answers and explanations were researched using FAA documents (and are identified so readers know where to go for further study on any given question) as well as through interviews with a variety of airline pilots, 121/135 operators, and examiners. The ATP Oral Exam Guide teaches applicants not only what to expect, but also

how to exhibit subject mastery and confidence when they're under the examiner's scrutiny. It identifies the candidates' strengths, weaknesses, and gaps in their aeronautical knowledge, which increases study efficiency.
