Life in the Bus Lane Pat Lunt 2010 England is replete with beautiful, stunning and serene landscapes overlaying a history and heritage that bubbles up to the surface almost everywhere you go. In an attempt to get an overall view of this amazing country without settling for too many blurred images through a car window and without the time for a detailed exploration on foot, Pat Lunt opts for an alternative transport choice—the bus. What delights and treasures can be discovered in the places visited by randomly selected timetabled service buses? Is it possible to simply step off a bus and find yourself in a village where they held the captured French Admiral from the Battle of Trafalgar? Could a bus journey get you to the highest inland cliffs in England or to a mysterious megalithic monument? Can you really wake up in a campsite in Gloucestershire and get all the way to a coastal resort in south Somerset in time for a good night's sleep, by using buses? Wouldn't travelling by bus simply take ages and cost you an arm and a leg? Pat Lunt decided to attempt answering these and many other questions in a month-long odyssey to the four corners of the country. On the way he finds himself in vibrant urban centres, quaint country villages and bustling seaside resorts; traversing National Parks, post-industrial landscapes and the M5. Without really trying, his haphazard progress leads him to stumble upon the haunts of kings, queens, inventors, smugglers and marauding Danes. He also discovers that travelling by bus is, after all is said and done, pretty good fun.

Question Answering for the Curated Web Rishiraj Saha Roy 2021-10-28 Question answering (QA) systems on the Web try to provide crisp answers to information needs posed in natural language, replacing the traditional ranked list of documents. QA, posing a multitude of research challenges, has emerged as one of the most actively investigated topics in information retrieval, natural language processing, and the artificial intelligence communities today. The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities, making it very difficult for new entrants to the field to get a good overview of the topic. Through this book, we make an attempt towards mitigating the above problem by providing an overview of the state-of-the-art in question answering. We cover the twin paradigms of curated Web sources used in QA tasks – trusted text collections like Wikipedia, and objective information distilled into large-scale knowledge bases. We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms, using instantiations of recent systems for illustration. We begin with an overview of the problem setup and evaluation, cover notable sub-topics like open-domain, multi-hop, and conversational QA in depth, and conclude with key insights and emerging topics. We believe that this resource is a valuable contribution towards a unified view on QA, helping graduate students and researchers planning to work on this topic in the near future.

[Obedience to Authority](#) Stanley Milgram 2017-07-11 A part of Harper Perennial's special "Resistance Library" highlighting classic works that illuminate our times: A special edition reissue of Stanley Milgram's landmark examination of humanity's susceptibility to authoritarianism. "The classic account of the human tendency to follow orders, no matter who they hurt or what their consequences." — Washington Post Book World In the 1960s, Yale University psychologist Stanley Milgram

famously carried out a series of experiments that forever changed our perceptions of morality and free will. The subjects—or “teachers”—were instructed to administer electroshocks to a human “learner,” with the shocks becoming progressively more powerful and painful. Controversial but now strongly vindicated by the scientific community, these experiments attempted to determine to what extent people will obey orders from authority figures regardless of consequences. “Milgram’s experiments on obedience have made us more aware of the dangers of uncritically accepting authority,” wrote Peter Singer in the New York Times Book Review. With an introduction from Dr. Philip Zimbardo, who conducted the famous Stanford Prison Experiment, *Obedience to Authority* is Milgram’s fascinating and troubling chronicle of his classic study and a vivid and persuasive explanation of his conclusions.

Service Quality Measurement: Issues and Perspectives Lewlyn L. R. Rodrigues 2013-06-01 This book is very useful for it is not just ‘descriptive’ in its nature, but ‘prescriptive’, too. It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation, and prescriptive as it clearly prescribes how a beginner can put the theory into practice. In this globalized economy, maintaining quality of products and services has been the thrust area of interest among academicians and practitioners. Today, there are quite a good number of books and research articles available. Nevertheless, service quality measurement has always posed problems, particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers. The research literature is filled with articles on how to quantify the services, and there

are several streams of arguments on the choice of the most ideal approach. However, the research gap lies in the answer to the question: ‘Do these measurement instruments concur in their measurement outcomes or do they give different results in the same situation?’ This book primarily makes an attempt to answer this question through a case study approach. Even though, there are several instruments for the measurement of service quality, the two most widely used instruments are SERVQUAL and SERVPERF metrics. Comprehensively, this book explains the systematic procedure of using both, the instruments in a service sector, and further, the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector. It then takes the reader through a series of tests in order to compare the two metrics, and to prove statistically if there is the same outcome in a problem situation. The results are sure to surprise the reader, and trigger the “research bent of mind” to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional guide. To conclude, this book is sure to provide adequate inputs for a service quality researcher, and answer various questions wriggling in the mind of a beginner of service quality research such as: How shall I start with service quality measurement? How to collect data? How to select a sample? How to conduct a literature review? How to analyse the data? What research methodology is applicable? How to build hypothesis on my research? How to use statistical procedures? How to present the [...]

Study Guide for Machine Shop Work John Theodore Shuman 1949
Responding to Children Writing 1986 Following a major policy statement on writing in the primary school, this document employs a threefold approach to examining the teaching difficulties involved in responding to children's writing. The first section considers expectations that teachers have of children as writers, children's intended meanings, and various kinds of responses to children's writing in different contexts. The pieces of writing examined indicate that, to effectively respond to children's writing, teachers must attempt to share meanings with the writer to uncover the text's implicit meanings. The second section examines conventions in the teaching of writing, including attitudes and significance, the relationship between content and conventions, and meaning and sentence structure. In short, this section argues that the development of formal skills should be dealt with in the context of the teacher's response to the content of a child's writing. The final section discusses teachers' responses to spelling errors, instruction, and testing. It emphasizes that spelling is not a "basic skill" in writing and is therefore of secondary importance to a child's effective written communication. Appendices treat (1) three ways of responding to children's writing, (2) class organization and school policy, (3) learning about words, and (4) language development and microcomputers. A 22-item, briefly annotated bibliography concludes the document. (JD)

Citizenship Dmitry Kochenov 2019-11-12 The story of citizenship as a tale not of liberation, dignity, and nationhood but of complacency, hypocrisy, and domination. The glorification of citizenship is a given in today's world, part of a civic narrative that invokes liberation, dignity, and nationhood. In reality, explains Dmitry Kochenov, citizenship is a story of complacency, hypocrisy, and domination, flattering to citizens and demeaning for noncitizens. In this volume in the MIT Press Essential Knowledge series, Kochenov explains the state of citizenship in the modern world. Kochenov offers a critical introduction to a subject most often regarded uncritically, describing what citizenship is, what it entails, how it came about, and how its role in the world has been changing. He examines four key elements of the concept: status, considering how and why the status of citizenship is extended, what function it serves, and who is left behind; rights, particularly the right to live and work in a state; duties, and what it means to be a “good citizen”; and politics, as enacted in the granting and enjoyment of citizenship. Citizenship promises to apply the attractive ideas of dignity, equality, and human worth—but to strictly separated groups of individuals. Those outside the separation aren't citizens as currently understood, and they

do not belong. Citizenship, Kochenov warns, is too often a legal tool that justifies violence, humiliation, and exclusion.

Cultural Differences in Using a Telephone Answering Machine

Evelinah Mathoho 2010-01 Living in South Africa also known as "The Rainbow Nation" a title which epitomizes the country's cultural diversity. After reading Miyamoto and Schwarz (2006)'s assumption that "cultural groups who are particularly sensitive to the value of maintaining relationship, have difficulties in using answering machine" I then decided to attempt to ascertain whether there are specific differences in using recorded messaging among the various South African language groups that relate to either the conveying information or the establishing of a communicative relationship. This book considers how technological intervention may affect features of the primary mode of communication, i.e. it investigates whether spoken language transmitted by answering machine is significantly different in its function, than when the transmission is face to face and immediate, with the aim of finding out, whether people of different linguistic cultures react differently to new technologies such as answering machine. This book should be useful in intercultural communication, linguistic, cultural studies and related areas. Conversation analysis was used for analyzing speech samples.

Unobtrusive Evaluation of Reference Service and Individual Responsibility Juris Dilevko 2000-09-30 Many reference librarians have been highly critical about unobtrusive evaluation studies. But can their opposition be justified? Or is it just a way to detract attention from serious shortcomings in reference service? How can government documents reference service, and reference service in general, be improved? Do librarians have enough general and subject-specific knowledge to provide informed and intelligent answers to reference questions? Would any business or non-profit organization be satisfied with the traditional 55 percent efficacy rate in reference service revealed by unobtrusive evaluation studies? Long a controversial topic in the specialized world of reference librarianship, unobtrusive evaluation is nevertheless a useful tool in gauging the degree to which reference librarians are effectively performing their jobs. Based on a nationwide study of government documents reference service in Canada, this book examines the broad philosophical implications of negative attitudes to unobtrusive evaluation studies within libraries. It also discusses what really happens when librarians make referrals to external sources. Drawing on the insights of such library educators as Margaret Hutchins, S. R. Ranganathan, and James Wyer, it also suggests overlooked ways that may help reference librarians deliver better reference service. Finally, it argues that such proposals as certification and recertification of reference librarians need to be seriously considered if librarians do not willingly take personal responsibility for improving their own knowledge levels.

The Green Republic Sterling Evans 2010-06-28 With over 25 percent of its land set aside in national parks and other protected areas, Costa Rica is renowned worldwide as "the green republic." In this very readable history of conservation in Costa Rica, Sterling Evans explores the establishment of the country's national park system as a response to the rapid destruction of its tropical ecosystems due to the expansion of export-related agriculture. Drawing on interviews with key players in the conservation movement, as well as archival research, Evans traces the emergence of a conservation ethic among Costa Ricans and the tangible forms it has taken. In Part I, he describes the development of the national park system and "the grand contradiction" that conservation occurred simultaneously with massive deforestation in unprotected areas. In Part II, he examines other aspects of Costa Rica's conservation experience, including the important roles played by environmental education and nongovernmental organizations, campesino and indigenous movements, ecotourism, and the work of the National Biodiversity Institute.
