Diabetes R. D. G. Leslie 1995-03-09 This significant new publication provides a summary and overview of the most recent scientific advances in diabetes research, and highlights the role of these developments in advancing clinical practice. Diabetes is one of the major causes of morbidity and mortality in the developed world, and its prevalence elsewhere is on the increase. It affects in excess of 100 million people worldwide. Recent scientific advances have clarified our understanding of the causes and consequences of this devastating disease. These scientific developments are playing an increasingly important role in clinical practice and could well lead the way to the prevention of complications and even a cure for the disease. An international and authoritative team of authors draws together this knowledge and the most recent developments to provide an up to date account which will benefit researchers and clinicians.

Family Adventures Austin Sailsbury 2020-09-22 These are real-life tales of moms and dads braving the unavoidable struggles of travel-flight delays, lost luggage, middle-of-nowhere engine breakdowns, and middle-of-everyone emotional meltdowns--to share new experiences with their kids. As all of these parents will tell you, traveling with kids is never easy. But the benefits can be invaluable. What could be more important than introducing our children to cultures where families, not so unlike our own, look and live and speak and eat differently than we do. What could be more useful than giving

them the tools to deal with the challenges encountered on the road. Taking risks, overcoming challenges, discovering beauty, and opening our minds and hearts. These are the things we hope for each time we pack our bags, load the car, or board a plane. This is why we leave home and head into the unknown. No matter how old we are, each of us wants to be filled with awe and to feel fully alive. And we want to share these experiences with the people we love the most, so that these moments of wonder might live on for years to come.- Travel tips for the age groups 0-3, 4-6, 7-10, 10-13 as well as thirteen and up are laid out in detailed chapters. Also for older children from the ages of eleven to thirteen for example, travel provides an opportunity to deepen a connection, or to reconnect, with a child that might be spending more and more time away from you.- Reif Larsen, author of the novels *The Selected Works of T. S. Spivet* and *I Am Radar*, speaks in his essay about rediscovering nature with his children around their home during the current travel restrictions. Family Adventures provides inspiration and guidance for vacations long and short; creating memories that last a lifetime.

Antimicrobial Resistance in Bacteria Carlos F. Amábile-Cuevas 2007 Presents nine comprehensive and cutting-edge reviews on the current state of antimicrobial resistance. Special emphasis is placed on state-of-the-art research and the authors focus on novel approaches and new perspectives. Topics include new antibiotics, biofilm resistance, drug efflux, plasmid-mediated resistance, extended-spectrum

beta-lactamases, monitoring of resistance, predicting the evolution of new resistance, antibiotic cycling, and a review of the system for the discovery and development of novel antibiotics.

Business Process Maturity Amy Van Looy 2014-01-27 Organisations face many challenges, which induce them to perform better, and thus to establish mature (or excellent) business processes. As they now face globalisation, higher competitiveness, demanding customers, growing IT possibilities, compliancy rules etc., business process maturity models (BPMs) have been introduced to help organisations gradually assess and improve their business processes (e.g. CMMI or OMG-BPM). In fact, there are now so many BPMs to choose from that organisations risk selecting one that does not fit their needs or one of substandard quality. This book presents a study that distinguishes process management from process orientation so as to arrive at a common understanding. It also includes a classification study to identify the capability areas and maturity types of 69 existing BPMs, in order to strengthen the basis of available BPMs. Lastly it presents a selection study to identify criteria for choosing one BPM from the broad selection, which produced a free online selection tool, BPM Smart-Selector.

Parenting by Men Who Batter Jeffrey L. Edleson 2007 What is the best way to work with fathers who have a history of abusive behavior? This question is among the thorniest that social service and criminal justice professionals must deal with in their careers, and in this essential new work Jeffrey L. Edleson, Oliver J. Williams, and a group of international colleagues examine the host of equally difficult issues that surround it. Beginning with the voices of mothers and fathers who speak about men's contact with and parenting of their children, the authors then examine court and mental health services perspectives on how much involvement violent men should have in their children's lives. The second half of the book showcases programs such as the Boston-based Fathering After Violence initiative and the Caring Dads program in Canada, which introduce non-abusive

parenting concepts and skills to batterers and have developed useful guidelines for intervention with these fathers. Visionary but also practical, Parenting by Men Who Batter distills the most relevant policy issues, research findings, and practice considerations for those who coordinate batterer programs or work with families, the courts, and the child welfare system. It guides professionals in understanding men who batter, assessing their parenting skills, making decisions about custody and visitation, and modeling treatment programs that engage fathers in their children's lives while maximizing safety.

Residential Duct Systems - Manual D Acca 2017-02 The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

Sensors and Microsystems Piero Malcovati 2010-03-14 Sensors and Microsystems contains a selection of papers presented at the 14th Italian conference on sensors and microsystems. It provides a unique perspective on the research and development of sensors, microsystems and

related technologies in Italy. The scientific values of the papers also offers an invaluable source to analysts intending to survey the Italian situation about sensors and microsystems. In an interdisciplinary approach many aspects of the disciplines are covered, ranging from materials science, chemistry, applied physics, electronic engineering and biotechnologies. Ancient Egyptian Literature 2009-06-03 A beautifully translated collection sampling all the major genres of ancient Egyptian literature. Poetry, stories, hymns, prayers, and wisdom texts found exquisite written expression in ancient Egypt while their literary counterparts were still being recited around hearth fires in ancient Greece and Israel. Yet, because of its very antiquity and the centuries during which the language was forgotten, ancient Egyptian literature is a newly discovered country for modern readers. This anthology offers an extensive sampling of all the major genres of ancient Egyptian literature. It includes all the texts from John Foster's previous book *Echoes of Egyptian Voices*, along with selections from his *Love Songs of the New Kingdom and Hymns, Prayers, and Songs: An Anthology of Ancient Egyptian Lyric Poetry*, as well as previously unpublished translations of four longer and two short poems. Foster's translations capture the poetical beauty of the Egyptian language and the spirit that impelled each piece's composition, making these ancient masterworks sing for modern readers. An introduction to ancient Egyptian literature and its translation, as well as brief information about the authorship and date of each selection, completes the volume. "This exceptional sampling of one of the world's most ancient literatures offers more than 40 hymns, stories, prayers, and songs revolving around religion, the Pharaohs, life, death, love, and

more. . . . Highly recommended for all literary collections, this is also of interest to comprehensive collections of Egyptology, Near Eastern history, world literature in translation, and religion." —Library Journal "Older than the Buddha and the Bhagavad Gita, these poems constitute a truly ancient literature, and Foster's rich and textured translations make genuine love poems and exhortations to the gods out of what, to most of us, are just pictures." —Booklist

Infrared Thermography and Thermal

Nondestructive Testing Vladimir Vavilov

2020-07-10 This is the first book summarizing the theoretical basics of thermal nondestructive testing (TNDT) by combining elements of heat conduction, infrared thermography, and industrial nondestructive testing. The text contains the physical models of TNDT, heat transfer in defective and sound structures, and thermal properties of materials. Also included are the optimization of TNDT procedures, defect characterization, data processing in TNDT, active and passive TNDT systems, as well as elements of statistical data treatment and decision making. This text contains in-depth descriptions of applications in infrared/thermal testing within aerospace, power production, building, as well as the conservation of artistic monuments The book is intended for the industrial specialists who are involved in technical diagnostics and nondestructive testing. It may also be useful for academic researchers, undergraduate, graduate and PhD university students.

Switzerland in Perspective Janet E. Hilowitz

1991-02-28 This volume is the only collection of essays available in English on modern Swiss economy, society, and culture. Twelve of Switzerland's most eminent social scientists express their ideas and viewpoints about their nation's past, present, and likely future in a readable and informative way. The book provides an interesting and current description and analysis of many aspects of this unique and little known country--its work and leisure, its political and economic structure, its educational system, changes affecting its women, families, and young people, how the Swiss view themselves and are viewed by others, and geographically varied life spaces and styles such as those of its cities and its more traditional mountain regions. The essays are substantive and critical, offering much more than a mere appreciation of this picture-postcard country. In the introduction, Hilowitz summarizes the main themes of the various essays and ties them together. The author of the first essay presents the principal features of Swiss urbanization and discusses recent changes which have affected the human settlement pattern. In the second essay, the broad institutional diffusion of power and decision making is explored. Three essays deal with various aspects of the Swiss workplace: trade unions, the work ethic, and women in the working world. Youth and their life prospects, as well as the educational system, are critically discussed in two essays. The authors of the essay on the structure and functioning of the family examine marriage, divorce, and styles of interaction within the family. Separate essays assess the life styles and social classes of the elderly, crime and crime control, changes affecting the rural population, and Switzerland's image abroad. *Switzerland in Perspective* will be an excellent resource for those interested in the broader scholarly or practical implications of Swiss economic, social, and political arrangements.

[Alternatives for the Demilitarization of Conventional Munitions](#) National Academies of Sciences, Engineering, and Medicine 2019-02-11 The U.S. military has a stockpile of approximately 400,000 tons of excess, obsolete, or unserviceable munitions. About 60,000 tons are added to the stockpile each year. Munitions include projectiles, bombs, rockets, landmines,

and missiles. Open burning/open detonation (OB/OD) of these munitions has been a common disposal practice for decades, although it has decreased significantly since 2011. OB/OD is relatively quick, procedurally straightforward, and inexpensive. However, the downside of OB and OD is that they release contaminants from the operation directly into the environment. Over time, a number of technology alternatives to OB/OD have become available and more are in research and development. Alternative technologies generally involve some type of contained destruction of the energetic materials, including contained burning or contained detonation as well as contained methods that forego combustion or detonation. *Alternatives for the Demilitarization of Conventional Munitions* reviews the current conventional munitions demilitarization stockpile and analyzes existing and emerging disposal, treatment, and reuse technologies. This report identifies and evaluates any barriers to full-scale deployment of alternatives to OB/OD or non-closed loop incineration/combustion, and provides recommendations to overcome such barriers.

The Seleukid Royal Economy G. G. Aperghis 2004-12-23 The Seleukid empire, the principal successor-state of the empire of Alexander the Great, endured for over 200 years and stretched, at its peak, from the Mediterranean to the borders of India. This book provides a wide-ranging study of the empire's economy and the methods used by the Seleukid kings to monetise and manage it so as to extract tribute, rent and taxes as efficiently as possible. It uses a variety of Greek literary sources and inscriptions, cuneiform texts, archaeological, numismatic and comparative evidence to explore in detail the manner of exploitation of their lands and subjects by the Seleukid kings, their city-building activity, the financing of their armies and administration, the use they made of coinage and their methods of financial management. The book adopts a highly original, numerical approach throughout, which leads to a quantified model of the economy of an ancient state.

When Love Goes Wrong Ann R. Jones 1993-04-14 Millions of women each year find themselves in relationships with controlling or abusive

partners and don't know what to do, or even what's wrong. A woman may feel anxious, inadequate, intimidated -- and as if she is walking on tiptoe. And she may find herself trying harder and harder to make things right without ever being successful. Ann Jones and Susan Schechter bring together their more than fifteen years of experience working with women in abusive relationships to offer an eyeopening new analysis of controlling partners and a wealth of empowering information for women who want to change their lives for the better. Full of moving first-person stories, *When Love Goes Wrong* shows women what their options are in or out of the relationship, provides concrete guidance on finding safety and support for themselves and their children, and includes a comprehensive list of agencies offering information or assistance.
