The Politics of Neoliberal Democracy in Africa Usman A. Tar 2009 Since the late 1980s the changing dynamic of global development has driven the tide of democratic expansion in the developing world. In Africa, western donors have sought to impose 'neo-liberal' visions of socio-economic and political institution-building, spreading political reforms and economic liberalisation with far-reaching

consequences. Associated with external interventions, but also sometimes conflicting with them, are internal protests against authoritarianism, which have problematically reinforced and/or undermined the donor agenda for democratic reform. Here, Usman Tar questions the assumption that Africa was lacking the essential components for a spontaneous transition to democracy. He explores the dynamic, but contradictory, links between external and internal dimensions of neo-liberal democratic expansion in Africa, focusing on Nigeria. Tar dissects the struggles for democracy, and for democratic policy and practice in a country with rich economic potential but a troubled political dispensation.

The First World War and the End of the Habsburg Monarchy, 1914-1918 Manfred Rauchensteiner 2014 The origins of World War I were different and varied. But it was Austria-Hungary which unleashed the war. After more than four years the Habsburg Monarchy was defeated and ended as a failed state.

Twelve Years A Slave, Illustrated Edition Solomon Northup 2014-04-08 Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

New Concepts and Trends of Hybrid Multiple Criteria Decision Making Gwo-Hshiong Tzeng 2017-08-15 When people or computers need to make a decision, typically multiple conflicting criteria need to be evaluated; for example, when we buy a car, we need to consider safety, cost and comfort. Multiple criteria decision making (MCDM) has been researched for decades. Now as the rising trend of big-data analytics in supporting decision making, MCDM can be more powerful when combined with state-of-the-art analytics and machine learning. In this book, the authors introduce a new framework of MCDM, which can lead to more accurate decision making. Several real-world cases will be included to illustrate the new hybrid approaches.

Semiotics Continues to Astonish Paul Copley 2011-07-27 Peirce's (1906) proposal that the universe as a whole, even if it does not consist exclusively of signs, is yet everywhere perfused with signs, is a thesis that better than any other sums up the life and work of Thomas A. Sebeok, "inventor" of semiotics as we know it today. Semiotics - the doctrine of signs - has a long and intriguing history that extends back well beyond the last century, two and a half millennia to Hippocrates of Cos. It ranges through the teachings of Augustine, Scholastic philosophy, the work of Peirce and Saussure. Yet a fully-fledged doctrine of signs, with many horizons for the future, was the result of Sebeok's work in the twentieth century. The massive influence of this work, as well as Sebeok's convening of semiotic projects and encouragement of a huge number of researchers globally, which, in turn, set in train countless research projects, is difficult to document and has not been assessed until now. This volume, using the testimonies of key witnesses and participants in the semiotic project, offers a picture of how Sebeok, through his development of knowledge of endosemiotics, phytosemiotics, biosemiotics and sociosemiotics, enabled semiotics in general to redraw the boundaries of science and the humanities as well as nature and culture.

Fuzzy Hierarchical Model for Risk Assessment Hing Kai Chan 2013-04-11 Risk management is often complicated by situational uncertainties and the subjective preferences of decision makers. Fuzzy Hierarchical Model for Risk Assessment introduces a fuzzy-based hierarchical approach to solve risk management problems considering both qualitative and quantitative criteria to tackle imprecise information. This approach is illustrated through number of case studies using examples from the food,

fashion and electronics sectors to cover a range of applications including supply chain management, green product design and green initiatives. These practical examples explore how this method can be adapted and fine tuned to fit other industries as well. Supported by an extensive literature review, Fuzzy Hierarchical Model for Risk Assessment comprehensively introduces a new method for project managers across all industries as well as researchers in risk management. this area.

Advances in Powder Metallurgy Isaac Chang 2013-08-31 Powder metallurgy (PM) is a popular metal forming technology used to produce dense and precision components. Different powder and component forming routes can be used to create an end product with specific properties for a particular application or industry. *Advances in powder metallurgy* explores a range of materials and techniques used for powder metallurgy and the use of this technology across a variety of application areas. Part one discusses the forming and shaping of metal powders and includes chapters on atomisation techniques, electrolysis and plasma synthesis of metallic nanopowders. Part two goes on to highlight specific materials and their properties including advanced powdered steel alloys, porous metals and titanium alloys. Part three reviews the manufacture and densification of PM components and explores joining techniques, process optimisation in powder component manufacturing and non-destructive evaluation of PM parts. Finally, part four focusses on the applications of PM in the automotive industry and the use of PM in the production of cutting tools and biomaterials. *Advances in powder metallurgy* is a standard reference for structural engineers and component manufacturers in the metal forming industry, professionals working in industries that use PM components and academics with a research interest in the field. Discusses the forming and shaping of metal powders and includes chapters on atomisation techniques Highlights specific materials and their properties including advanced powdered steel alloys, porous metals and titanium alloys Reviews the manufacture and densification of PM components and explores joining techniques

Epigenetics in Cardiovascular Disease Yvan Devaux 2021-03-06 Epigenetics in Cardiovascular Disease, a new volume in the Translational Epigenetics series, offers a comprehensive overview of the epigenetics mechanisms governing cardiovascular disease development, as well as instructions in research methods and guidance in pursuing new studies. More than thirty international experts provide an (i) overview of the epigenetics mechanisms and their contribution to cardiovascular disease development, (ii) high-throughput methods for RNA profiling including single-cell RNA-seq, (iii) the role of nucleic acid methylation in cardiovascular disease development, (iv) epigenetic actors as biomarkers and drug targets, (v) and the potential of epigenetics to advance personalized medicine. Here, readers will discover strategies to combat research challenges, improve quality of their epigenetic research and reproducibility of their findings. Additionally, discussion of assay and drug development for personalized healthcare pave the way for a new era of understanding in cardiovascular disease. Offers a thorough overview of role of epigenetics mechanisms in cardiovascular disease Includes guidance to improve research plans, experimental protocols design, quality and reproducibility of results in new epigenetics research Explores biomarkers and drug targets of therapeutic potential to advance personalized healthcare Features chapter contributions from a wide range of international researchers in the field

Seduced by Secrets Kristie Macrakis 2008-03-17 More fascinating than fiction, *Seduced by Secrets* takes the reader inside the real world of one of the most effective and feared spy agencies in history. The book reveals, for the first time, the secret technical methods and sources of the Stasi (East German Ministry for State Security) as it stole secrets from abroad and developed gadgets at home, employing universal, highly guarded techniques often used by other spy and security agencies. *Seduced by Secrets* draws on secret files from the Stasi archives, including CIA-acquired material, interviews and friendships, court documents, and unusual visits to spy sites, including "breaking into" a prison, to demonstrate that the Stasi overestimated the power of secrets to solve problems and created an insular spy culture more intent on securing its power than protecting national security. It recreates the Stasi's secret world of technology through biographies of agents, defectors, and officers and by visualizing James Bond-like techniques and gadgets. In this highly original book, Kristie Macrakis adds a new dimension to our understanding of the East German Ministry for State Security by bringing the topic into the realm of espionage history and exiting the political domain.

Strategic Latency Unleashed Zachary Davis 2021-01-30 The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and

relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

The Vacuum Cleaner Carroll Gantz 2012-09-26 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

The Divine Conspiracy Continued Dallas Willard 2014-06-17 Dallas Willard, the author of the bestselling spiritual classic, *The Divine Conspiracy*, now fulfills his revolutionary vision of how the kingdom of God is made real on earth in this sequel, the last book he was working on before his recent death. In *The Divine Conspiracy*, revered Christian philosopher and scholar Dallas Willard critiqued the church's obsession with "sin management" and revolutionized our understanding of true Christian discipleship. Jesus is not a remote savior, waiting to welcome us into heaven after we die, Willard argued. He is a dynamic living force, a leader and teacher to whom we apprentice ourselves to learn the sacred skills God wants us to embrace, and to fulfill His son's vision when Christ declared that the "kingdom of God has come." In *The Divine Conspiracy Continued*, co-written with theologian Gary Black, Willard lays out the next stage in God's plan as this generation of disciples, including ordained and lay leaders, step into positions of authority across our culture and begin to transform the world from the inside out. To fulfill the Christian calling is not to remove oneself from the outside world and take shelter from its shortcomings, Willard reminds us, but to

step into the world to lead and serve as agents of change.

Systematic Theology Louis Berkhof 2022-11-30 Considered one of the classics on Systematic Theology, the book covers all the basics on the reality of God, the atonement of Christ and the final state of man and the last things. Anyone who wishes to study theology would be wise to read this book as many in the Reformed tradition hold that it is a landmark in its field. It is arguably the most important twentieth century compendium of Reformed Theology. 'The work seemed particularly important to me', writes the author, 'in view of the widespread doctrinal indifference of the present day, of the resulting superficiality and confusion in the minds of many professing Christians, of the insidious errors that are zealously propagated even from the pulpits, and of the alarming increase of all kinds of sects.'

Foundations of Strategy Robert M. Grant 2015-07-20 Foundations of Strategy, Canadian Edition is a concise text aimed at both undergraduate and MBA students. With the needs of these students in mind, the authors made sure that the text was written in an accessible style, with a clear, comprehensive approach and sound theoretical depth. An excellent set of current and in-depth Canadian and global cases will show students how to apply the strategy concepts in real-world scenarios. Today's strategy modules are delivered in a wide variety of different formats to a wide range of audiences. Instructors frequently find themselves faced with the challenge of delivering their modules in relatively short time frames to student groups with very diverse educational and employment backgrounds. This text is designed to assist instructors in meeting this challenge by covering the core aspects of strategy as concisely as possible without losing academic depth.

Government Use of Artificial Intelligence in New Zealand Colin Gavaghan 2019 "This is the first major report from the Artificial Intelligence and the Law Project. The overall focus of the report is on the regulatory issues surrounding uses of artificial intelligence (AI) in New Zealand. There are many types of AI systems, and many spheres within which AI systems are used (in New Zealand and beyond). Phase 1 of the project focuses on regulatory issues surrounding the use of predictive AI models in New Zealand government departments. As discussed in the report, while there are many types of AI model, the concept of a "predictive model" picks out a reasonably well-defined class of models that share certain commonalities and are fairly well characterisable as a regulatory target. The report specifically focuses on the use of predictive models in the public sector because the researchers want to begin by discussing regulatory options in a sphere where the New Zealand Government can readily take action. New Zealand's Government can relatively easily effect changes in the way its own departments and public institutions operate. The report identifies and discusses a number of primary concerns: Accuracy, Human control, Transparency and a right to reasons/explanations, Bias, fairness and discrimination, Privacy. Individual rights are vital for any democracy but exclusive reliance should not be placed on individual rights models that depend on affected parties holding predictive algorithms to account. Often, individuals will lack the resources to do so. Furthermore, individual rights models might offer limited efficacy in monitoring group harms. With regard to oversight and regulation, one of the key recommendations of the report is that Government should consider the establishment of a regulatory/oversight agency. Several possible models for the new regulatory agency are proposed in the report. The new regulator could serve a range of other functions, including: Producing best practice guidelines; Maintaining a register of algorithms used in government; Producing an annual public report on such uses; Conducting ongoing monitoring on the effects of these tools. The report indicates preference for a relatively "hard-edged" regulatory agency, with the authority to demand information and answers, and to deny permission for certain proposals. However, even a light-touch regulatory agency could serve an important function. The researchers stress the need for consultation with a wide range of stakeholders across New Zealand society, especially with populations likely to be affected by algorithmic decisions, and with those likely to be under-represented in construction and training. This is likely to include those in lower socio-economic classes, and Māori and Pacific Island populations. Quite simply, they are likely to have insights, concerns and perspectives that will not be available to even the most well-intentioned of outside observers."--Publisher's website.
