**Practical Methods for Analysis and Design of HV Installation Grounding Systems** Ljubivoje M. Popovic 2018-02-20 Practical Methods for Analysis and Design of HV Installation Grounding Systems gives readers a basic understanding of the modeling characteristics of the major components of a complex grounding system. One by one, the author develops and analyzes each component as a standalone element, but then puts them together, considering their mutual disposition, or so-called proximity effect. This is the first book to enable the making and analysis of the most complex grounding systems that are typical for HV substations located in urban areas that uses relatively simple mathematical operations instead of modern computers. Since the presented methods enable problem-solving for more complex issues than the ones solved using National, IEC and/or IEEE standards, this book can be considered as an appendix to these standards. Develops general equations of lumped parameter ladder circuits Includes the analytical expression for determination of ground fault current distribution for a fault anywhere along a cable line Presents measurement and analytical methods for the determination of actual ground fault current distribution for high-voltage substations located in urban areas Provides the analytical procedure for the determination of the critical ground fault position for faults appearing in outgoing transmission lines Defines testing procedure for the correct evaluation of grounding systems of substations located in urban areas

**DMT Dialogues** David Luke 2018-08-14 Cutting-edge explorations and discussions of DMT experiences and plant sentience from leading luminaries in the field of psychedelic research • Includes contributions from Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Peter Meyer, David Luke, and many others • Explores DMT beings, plant sentience, interspecies communication, discarnate consciousness, dialoguing with the divine, the pineal gland, the Amazonian shamanic perspective on Invisible Entities, and the science behind hallucinations Encounters with apparently sentient beings are reported by half of all first time users of the naturally occurring psychedelic DMT, yet the question of DMT beings and plant sentience, interspecies communication, discarnate consciousness, and perhaps even dialoguing with the divine has never been systematically explored. In September 2015, ten of the world's leading luminaries noted for exploring the mysterious compound DMT (dimethyltryptamine) gathered with other researchers at Tyringham Hall in England to discuss the subject. Over three days, they pooled their expertise from a wide range of subjects--archaeology, anthropology, religious studies, psychology, neuroscience, chemistry, and psychopharmacology, to name a few--to explore the notion of "entheogenic plant sentience" and the role of DMT as a conduit between Spirit and Matter. Offering cutting-edge insights into this visionary domain, this book distills the potent exchange of ideas that occurred at Tyringham Hall, including presentations and discussions on DMT entities, the pineal gland, the possibility of DMT as a chemical messenger from an extraterrestrial civilization, the Amazonian shamanic perspective on Invisible Entities, morphic resonance, and the science behind hallucinations. Contributors to the talks and discussions include many leading thinkers in this field, including Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Ede Frecska, Luis Eduardo Luna, Bernard Carr, Robin Carhart-Harris, Graham St. John, David Luke, Andrew Gallimore, Peter Meyer, Jill Purce, William Rowlandson, Anton Bilton, Vimal Darpan, Santha Faiia, and Cosmo Feilding Mellen.

**A Lady's Guide to Gossip and Murder** Dianne Freeman 2019-06-25 The adventurous Countess Harleigh finds out just how far some will go to safeguard a secret in Dianne Freeman's latest witty and delightful historical mystery . . . Though American by birth, Frances Wynn, the now-widowed Countess of Harleigh, has adapted admirably to the quirks and traditions of the British aristocracy. On August twelfth, otherwise known as the Glorious Twelfth, most members of the upper class retire to their country estates for grouse-

shooting season. Frances has little interest in hunting—for birds or a second husband—and is expecting to spend a quiet few months in London with her almost-engaged sister, Lily, until the throng returns. Instead, she's immersed in a shocking mystery when a friend, Mary Archer, is found murdered. Frances had hoped Mary might make a suitable bride for her cousin, Charles, but their courtship recently fizzled out. Unfortunately, this puts Charles in the spotlight—along with dozens of others. It seems Mary had countless notes hidden in her home, detailing the private indiscretions of society's elite. Frances can hardly believe that the genteel and genial Mary was a blackmailer, yet why else would she horde such juicy tidbits? Aided by her gallant friend and neighbor, George Hazelton, Frances begins assisting the police in this highly sensitive case, learning more about her peers than she ever wished to know. Too many suspects may be worse than none at all—but even more worrying is that the number of victims is increasing too. And unless Frances takes care, she'll soon find herself among them . . . “Engrossing . . . Freeman takes a witty look at Victorian polite society. Historical mystery fans will be delighted.” —Publishers Weekly
