In Defense of Disciplines Jerry A. Jacobs 2014-02-05 Calls for closer connections among disciplines can be heard throughout the world of scholarly research, from major universities to the National Institutes of Health. In Defense of Disciplines presents a fresh and daring analysis of the argument surrounding interdisciplinarity. Challenging the belief that blurring the boundaries between traditional academic fields promotes more integrated research and effective teaching, Jerry Jacobs contends that the promise of interdisciplinarity is illusory and that critiques of established disciplines are often overstated and misplaced. Drawing on diverse sources of data, Jacobs offers a new theory of liberal arts disciplines such as biology, economics, and history that identifies the organizational sources of their dynamism and breadth. Illustrating his thesis with a wide range of case studies including the diffusion of ideas between fields, the creation of interdisciplinary scholarly journals, and the rise of new fields that spin off from existing ones, Jacobs turns many of the criticisms of disciplines on their heads to mount a powerful defense of the enduring value of liberal arts disciplines. This will become one of the anchors of the case against interdisciplinarity for years to come.

Winning Their Place Heidi J. Osselaer 2011-09 In January 1999, five women were elected to the highest offices in Arizona, including governor, secretary of state, attorney general, treasurer, and superintendent of public instruction. The "Fab Five," as they were dubbed by the media, were sworn in by U.S. Supreme Court Justice Sandra Day O'Connor, herself a former member of the Arizona legislature. Some observers

assumed that the success of women in Arizona politics was a result of the modern women's movement, but *Winning Their Place* convincingly demonstrates that these recent political victories have a long and fascinating history. This landmark book chronicles for the first time the participation of Arizona women in the state's early politics. Incorporating impressive original research, *Winning Their Place* traces the roots of the political participation of women from the territorial period to after World War II. Although women in Arizona first entered politics for traditional reasons—to reform society and protect women and children—they quickly realized that male politicians were uninterested in their demands. Most suffrage activists were working professional women, who understood that the work place discriminated against them. In Arizona they won the vote because they demanded rights as working women and aligned with labor unions and third parties that sympathized with their cause. After winning the vote, the victorious suffragists ran for office because they believed men could not and would not represent their interests. Through this process, these Arizona women became excellent politicians. Unlike women in many other states, women in Arizona quickly carved out a place for themselves in local and state politics, even without the support of the reigning Democratic Party, and challenged men for county office, the state legislature, state office, Congress, and even for governor. This fascinating book reveals how they shattered traditional notions about "a woman's place" and paved the way for future female politicians, including the "Fab Five" and countless others who have changed the course of Arizona history.

Constructing a Bridge Eda Kranakis 1997 A historical look at styles of technological research and design. If it is true, as Tocqueville suggested, that social and class systems shape technology, research, and knowledge, then the effects should be visible both at the individual level and at the level of technical institutions and local environments. That is the central issue addressed in *Constructing a Bridge*, a tale of two cultures that investigates how national traditions shape technological communities and their institutions and become embedded in everyday engineering practice. Eda Kranakis first examines these issues in the work of two suspension bridge designers of the early nineteenth century: the American inventor James Finley and the French engineer Claude-Louis-Marie-Henri Navier. Finley--who was oriented toward the needs of rural, frontier communities--designed a bridge that could be easily reproduced and constructed by carpenters and blacksmiths. Navier--whose professional training and career reflected a tradition of monumental architecture and had linked him closely to the Parisian scientific community--designed an elegant, costly, and technically sophisticated structure to be built in an elite district of Paris. Charting the careers of these two technologists and tracing the stories of their bridges, Kranakis reveals how local environments can shape design goals, research practices, and design-to-construction processes. Kranakis then offers a broader look at the technological communities and institutions of nineteenth-century France and America and at their ties to technological practice. She shows how conditions that led to Finley's and Navier's distinct designs also fostered different systems of technical education as well as distinct ideologies and traditions of engineering research. The result of this two-tiered, comparative

approach is a reorientation of a historiographic tradition initiated by Tocqueville (and explored more recently by Eugene Ferguson, John Kasson, and others) toward a finer-grained analysis of institutional and local environments as mediators between national traditions and individual styles of technological research and design.

**Designing the New American University** Michael M. Crow 2015-03-15 A radical blueprint for reinventing American higher education. America's research universities consistently dominate global rankings but may be entrenched in a model that no longer accomplishes their purposes. With their multiple roles of discovery, teaching, and public service, these institutions represent the gold standard in American higher education, but their evolution since the nineteenth century has been only incremental. The need for a new and complementary model that offers broader accessibility to an academic platform underpinned by knowledge production is critical to our well-being and economic competitiveness. Michael M. Crow, president of Arizona State University and an outspoken advocate for reinventing the public research university, conceived the New American University model when he moved from Columbia University to Arizona State in 2002. Following a comprehensive reconceptualization spanning more than a decade, ASU has emerged as an international academic and research powerhouse that serves as the foundational prototype for the new model. Crow has led the transformation of ASU into an egalitarian institution committed to academic excellence, inclusiveness to a broad demographic, and maximum societal impact. In *Designing the New American University*, Crow and coauthor William B. Dabars—a historian whose research focus is the American research university—examine the emergence of this set of institutions and the imperative for the new model, the tenets of which may be adapted by colleges and universities, both public and private. Through institutional innovation, say Crow and Dabars, universities are apt to realize unique and differentiated identities, which maximize their potential to generate the ideas, products, and processes that impact quality of life, standard of living, and national economic competitiveness. *Designing the New American University* will ignite a national discussion about the future evolution of the American research university.

**My Little Blue Book of Project Management** Deji Badiru 2014-03-05 My Little Blue Book of project management presents a concise and succinct guide for managing projects at home, work, or leisure. It is, indeed, a little blue book. Both personal and corporate projects can benefit from the contents of the book, although the primary focus is on personal projects at home. We tend to be more organized at work than we are at home. Thus, a book focusing on applying project management at home is very much needed. The essential elements of project management are presented in My Little Blue of Project Management, where the common thread for managing any type of project, both big and small, is the personal commitment of the humans to the project at hand. Regardless of the efficacy of the computer tools and analytic techniques available for project management, the underlying foundation for success, in the premise of this book, is personal commitment. If the most effective tools are not used promptly and properly, no amount of wishful practices and corrective actions can make a precarious project successful. My Little Blue Book of project management advocates preempting project problems through advance planning, organizing, resource allocation, scheduling, and control of project activities. For ease of reference, My Little Blue Book of Project Management is organized in seven topical areas of What, Why, Who, Where, When, Which, and How.

*The Soldier's Blue Book* Department of Defense 2017-04-12 This is the guide for all Initial Entry Training (IET) Soldiers who enter the Army. It provides an introduction to the Army. Throughout the Blue Book, Soldiers will read and learn about Army Values, Culture, History, Organizations, and Training they will receive. It provides assistance with pay issues, leave, Thrift Saving Plans, and organizations that will be available to assist the families. The Soldier's Blue Book is an inspectable item and will be carried at all times. Training to standard and gaining the inner strength to adapt and overcome adversity became the theme for our Army's training model. Baron von Steuben, by then the Army Inspector General, wrote the Regulations for the Order and Discipline of the Troops of the United States—now commonly referred to as the Blue Book—as an instructional guide for future generations. This book consists, as our modern version does now, of detailed training procedures, the standards of military conduct, and the fundamentals every Soldier needs to know for them to succeed.
