It is now 40 years since the first BMW 5 Series went down the production lines at Dingolfing. Back in 1972, only the BMW executives with the greatest of foresight could have predicted that in 2012, the 5 Series would still be in production and still be the class leader - and it's amusing to note that the latest model - the F10 520i - is also a two litre four cylinder just as those first Fives were. BMW occupies a unique position in the hearts of car buyers and enthusiasts for no other marque of car has such a wide fan base. From what are probably the finest range of cars in the world to an enjoyable secondhand car, through to concours events, track days to drifting championships plus huge clubs and countless forums, no other manufacturer has such a huge and diverse following as BMW. The large numbers of the first three generations of the 5 Series that still survive attest to that, and this book is aimed at owners wanting to know more and pick up some useful maintenance, repair and restoration tips.
