"" "" *Financial Reporting under IFRS* Wolfgang Dick 2011-02-25 The International Financial Reporting Standards are quite different from other sets of accounting standards, and are fundamentally different from US-GAAP, in that they are based on principles, and not on detailed rules. *Financial Reporting under IFRS*:A topic-based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating Segments (IFRS 8). *Financial Reporting under IFRS* is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

Accounting for Biological Assets Rute Gonçalves 2017-10-16 This book explores accounting for biological assets under IAS 41 - Agriculture, and explains the recent adjustments introduced by the IASB which allow firms to choose between cost or revaluation models concerning mature bearer plants. Identifying the firm and country-level drivers that inform the disclosure and measurement practices of biological assets, this concise guide examines the value relevance of measuring those assets at fair value. It also analyses how firm and country-level drivers explain the differences in the disclosure level and practices used to measure biological assets under IAS 41. Finally, it evaluates whether there is a difference in the relevance of biological assets among the listed firms with high and low disclosure levels on biological assets. Based on a major international study of a wide selection of firms and country-level drivers, this book is vital for standard setters, stakeholders, students, accountants and auditors who need to understand disclosure and measurement practices of biological assets under IAS 41.

Flexible Management of Transfer Prices and Multiple Valuation Approach Based upon SAP ERP within the Context of International Controlling Cenk Yildirim 2015-12-01 Master's Thesis from the year 2014 in the subject Business economics - Controlling, grade: 1,7, University of Applied Sciences Fulda, course: Master of International Management, language: English, abstract: According to the estimations of the World Trade Organization, sixty percent of the whole world trade is being concluded within the multinational enterprises. This can be put down to the fact that globalization has had led the enterprises separate business processes into divisions and the concept of "profit center" has gained currency in this regard. As a result of "vertical integration" between these profit centers, there is an enormous volume of exchanged goods within multinationals. This development in the practice gave rise to debates on an already existing issue, "Transfer Pricing", however, from another dimension. The inter-company transfer of goods has gone beyond the domestic boundaries, and become an important issue in the international context. International Transfer Pricing can be assumed as an opportunity as well as a confounding factor from the perspective of multinational enterprises. On the one side, it is possible to move profits between individual divisions and create tax advantages depending on the corporate tax rates in different tax jurisdictions. On the other side, it becomes more complex for companies to track down the effects of intra-company transfers, evaluate the efficiency of the divisions and the company as a whole and make optimal decisions accordingly. At this point, some academicians propose using a multiple set of books to determine Transfer Prices. In so doing, they argue that managerial requirements can be met and optimal decisions can be reached for the good of the group as a whole. In the light of this information, a software product named SAP® ERP® comes to attention with its unique feature in terms of determining Transfer Prices flexibly. The multiple valuation approach in this system enables the user set Transfer Prices in different valuation techniques, i.e. legal view, group view and profit center view. This study investigates the relationship between these two research

objects; thus, aims to verify whether and up to which extent implementing such a system is functional and beneficial by composing Transfer Pricing and managerial requirements that come along with it.
