Global Health Governance Jeremy Youde 2013-04-24 In recent years the spread of diseases such as AIDS, SARS and avian flu has pushed health issues towards the top of the international agenda. Such outbreaks have serious political, economic, and social consequences and remind the world of the necessity of global cooperation in order to deal effectively with the challenges they pose. Global Health Governance offers a comprehensive introduction to the changing international legal environment, the governmental and non-governmental actors involved with health issues, and the current regime's ability to adapt to new crises. Part 1 focuses on the evolution of international regulations aimed at stopping the spread of health problems across borders. Over the last 150 years, the nature of such cooperation, the motivations of the parties involved, and the diseases covered, has changed radically. Part 2 examines some of the most prominent actors in global health governance today, ranging from traditional intergovernmental organizations, such as the WHO and the World Bank, to private philanthropic organizations that exist outside regular global governance structures. Part 3 concentrates on some of the most pressing issues facing global health governance today, including access to pharmaceuticals, the costs and benefits of making health a security issue, and the role of civil society organizations. Global Health Governance provides an accessible and insightful analysis of an evolving realm of global governance and cooperation. It will appeal to students of global health politics, global governance, international organization, and human security.

Monuments of Progress Claudia Agostoni 2003 In this groundbreaking book, Claudia Agostoni examines modernization in Mexico City during the era of Porfirio Díaz. She outlines the relationship of "enlightened" ideals of orderliness and hygiene to Mexican initiatives in public health. The implementation of new health policies and programs - such as the construction of a drainage system for the Valley of Mexico - were of utmost importance for the symbolic legitimization of Porfirio Díaz's durable regime (1876-1910), which emphasized modernization over individual rights and liberties. Thus, projects involving drastic engineering measures, authoritarian sanitary administration, and urban improvements were paramount in transforming the city into a healthy environment. Providing detailed analyses of the objectives and activities of the Superior Sanitation Council and, in particular, the work of the sanitary inspectors, *Monuments of Progress* provides a fresh take on the history of medicine and public health, shifting the emphasis away from the history of epidemic disease and the heroes of medicine to public health in a broader social framework. Agostoni's unique study builds on a small but fast-growing body of literature on the history of public health in Latin America, and it will appeal to scholars with an interest in medical history, urban history, and the history of nineteenth-century Mexico. Born in Mexico City, Claudia Agostoni earned her Ph.D. in Latin American cultural studies from King's College London, University of London. She is currently a full-time researcher at the Instituto de Investigaciones Históricas at Universidad Nacional Autónoma de México and lectures in Latin American colonial history.

Metamorphism and Metamorphic Belts Akiho Miyashiro 2012-12-06 My book *Metamorphic Rocks and*

Metamorphic Belts (in Japanese) was published by Iwanami Shoten, Publishers, in Tokyo in 1965. A few years later, Mr D. Lynch-Blosse of George Allen & Unwin Ltd contacted me to explore the possibility of translating it into English. Thus, translation accompanied by rewriting of substantial parts of the book was made in subsequent years, resulting in the present book *Metamorphism and Metamorphic Belts*. This title was chosen to emphasize the tectonic Significance of metamorphic belts. Metamorphic geology has a long history. The microscopic description and classification of metamorphic rocks began in the late nineteenth century. The theory of equilibrium mineral assemblages began in the first half of the twentieth century. Detailed mineralogical studies and the experimental determination of the pressure-temperature conditions of metamorphism began in the 1950s. The importance of metamorphic petrology in our understanding of the tectonic processes has been realized only in the past decade. This book is intended to synthesize the mineralogic, petrologic" and tectonic aspects of metamorphism. Advanced treatment of the thermodynamic and structural aspects is not intended.

Ductile Shear Zones Soumyajit Mukherjee 2015-12-21 The elucidation of the mechanisms and kinematics of shear zone deformation, at both local and regional scales, is the subject of a great deal of interest to scientists in the hydrocarbon industry, in seismology, and in structural geology more generally. This book comprises a collection of five theoretical and twelve regional contributions to the subject from a number of leading researchers in the field, with particular emphasis on work carried out in the Indian subcontinent. The book will be invaluable to advances students and researchers involved in the kinematics of shear.

Plant and Algae Biomass Rouf Ahmad Bhat 2022-02-17 This volume discusses how plant and algae organisms play a pivotal role in the transformation of solar energy to essential metabolites, and explores the numerous beneficial roles these metabolites have at an industrial level. It presents information on the utilization of plant and algae for biomass production, and shows how this is a practical option for large scale biofuel production. The book examines how these bio-metabolites can then be used to extract biofuel. Biomass produced from plants and algae can act as the source of feedstock for biofuel production and industrially important compounds. This book also explores that by curtailing culturing cost using wastewater, seawater, and industrial water as a nutrient and water source, biomass becomes an economical energy source. The introductory chapters of the book focus on the appreciative values of a pollution-free atmosphere, with special reference to enhanced greenhouse effect, and then are followed by chapters on the potential of plant and algae as a liquid energy resource. This book targets researchers, graduate students, and energy and fuel industry professionals interested in the plant sciences, biotechnology and renewable energy.

Infertility and Assisted Reproduction Botros Rizk 2008-09-15 Assisted reproductive technology (ART) is available to two-thirds of the world's population, and world-class experts, representing research from 18 different countries, have contributed to this groundbreaking textbook, detailing the techniques and philosophies behind medical procedures of infertility and assisted reproduction. This is one of the most rapidly changing and hotly debated fields in medicine. Different countries have different restrictions on the research techniques that can be applied to this field, and, therefore, experts from around the world bring varied and unique authorities to different subjects in reproductive technology. Encompassing the latest research into the physiology of reproduction, infertility evaluation and treatment, and assisted

reproduction, it concludes with perspectives on the ethical dilemmas faced by clinicians and professionals. This book will be the definitive resource for those working in the areas of reproductive medicine world wide.

Glaucome Primitif À Angle Ouvert Jean Paul Renard 2014-05-06 Le glaucome est une maladie dégénérative du nerf optique qui entraîne une perte progressive de la vision commençant tout d'abord en périphérie et progressant graduellement vers le centre. Cette maladie est souvent associée à une pression intra-oculaire (PIO) élevée qui comprime et endommage les fibres du nerf optique et de la rétine. Dans d'autres cas, malgré une PIO normale, une circulation sanguine inadéquate entraîne la mort (nécrose) des cellules du nerf optique et de la rétine. La perte de vision associée au glaucome est permanente et irréversible. Sans traitement, cette maladie peut mener jusqu'à la cécité. Le glaucome est une maladie fréquente puisqu'il atteint 2 % de la population totale en France. Ce sujet de santé publique fera l'objet du rapport annuel de la SFO en 2014. Le rapport abordera: - les bases fondamentales et cliniques; - la prise en charge thérapeutique; - les aspects socio-économiques et juridiques; - le dépistage et les incidences en terme de santé publique.

Ovarian Hyperstimulation Syndrome Botros Rizk 2006-05-08 Ovarian Hyperstimulation Syndrome (OHSS) is a condition that can occur in women undergoing in vitro fertilization, after having follicle stimulation hormone (FSH) injections to stimulate egg growth and maturation. Some patients respond excessively to the drug and dose given. If large numbers of eggs mature, the high hormone levels combined with the increased size of the ovaries, can cause extreme, and sometimes lethal, side effects. The pathophysiology, prevention and management of this syndrome have been revolutionized over the past decade and it is important for reproductive practitioners and infertility specialists to understand the latest findings about this potentially deadly condition. The author reviews in depth the important classification, epidemiology, pathophysiology, complications and prediction, prevention and treatment options for this pathology. This book is intended for infertility specialists, reproductive medicine specialists and assisted reproduction specialists.

Hearing Impairment and Disability Ariel Tenenbaum 2020 "Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers"--

Routledge Handbook of Global Health Security Simon Rushton 2014-08-07 This new Handbook presents an overview of cutting-edge research in the growing field of global health security. Over the past decade, the study of global health and its interconnection with security has become a prominent and rapidly growing field of research. Ongoing debates question whether health and security should be linked; which (if any) health issues should be treated as security threats; what should be done to address health security threats; and the positive and negative consequences of 'securitizing' health. In academic and policy terms, the health security field is a timely and dynamic one and this handbook will be the first work comprehensively to address this agenda. Bringing together the leading experts and commentators on health security issues from across the world, the volume comprises original and cutting-edge essays addressing the key issues in the field and also highlighting currently neglected avenues for future research. The book intends to provide an accessible yet sophisticated introduction to the key topics and debates and is organised into four key parts: Health Securities: the fundamental conceptual issues, historical links between health and security and the various ways of conceptualising health as a security issue Threats: those health issues which have

been most frequently discussed in security terms Responses: the wide range of contemporary security-driven responses to health threats Controversies: the securitization of health, its impact on rights and justice and the potential distortion of the global health agenda This book will be of great interest to students of global health security, public health, critical security studies, and International Relations in general.

Animal Models of Neurotrauma Mårten Risling 2019-07-30 This volume looks into the need for a variety of experimental models for research on traumatic brain injury (TBI) and peripheral nervous system. It also describes a number of experimental models, such as mechanical devices, that have been developed to model neurotrauma in animal experiments. The overall aim of this book is to explore the variety of models and how they are used in current research. The chapters in this book are organized in four sections and talk about animal models for TBI; animal models for spinal cord or nerve injury; and translational aspects, secondary injuries, in vitro studies, and evaluation of large data sets. In Neuromethods series style, chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory. Cutting-edge and comprehensive, *Animal Models of Neurotrauma* is a valuable resource for researchers interested in expanding their knowledge and research in this developing field.

Quality and Risk Management in the IVF Laboratory David Mortimer 2007-12-24 This essential survival guide for successfully managing the modern-day IVF clinic condenses a wealth of expertise and experience from the authors in troubleshooting and implementing quality management in the IVF laboratory. With high-profile media coverage of mistakes at IVF clinics, and escalating regulatory scrutiny, there is increasing pressure for professional accreditation. Modern accreditation schemes, which are largely based on the principles of ISO 9001 and related standards, require Quality Systems. Yet quality management beyond basic assay quality control is often poorly understood by biomedical scientists outside clinical chemistry laboratories. Quality and risk management are thus becoming hot topics for those working in IVF clinics and this book brings together, for the first time in one place, the basics of these essential aspects of laboratory management. The focus on taking a holistic approach to 'prophylactic management' - prevention rather than cure - will be welcomed by all scientists working in IVF.

Towards Integrative Machine Learning and Knowledge Extraction Andreas Holzinger 2017-10-27 The BIRS Workshop "Advances in Interactive Knowledge Discovery and Data Mining in Complex and Big Data Sets" (15w2181), held in July 2015 in Banff, Canada, was dedicated to stimulating a cross-domain integrative machine-learning approach and appraisal of "hot topics" toward tackling the grand challenge of reaching a level of useful and useable computational intelligence with a focus on real-world problems, such as in the health domain. This encompasses learning from prior data, extracting and discovering knowledge, generalizing the results, fighting the curse of dimensionality, and ultimately disentangling the underlying explanatory factors in complex data, i.e., to make sense of data within the context of the application domain. The workshop aimed to contribute advancements in promising novel areas such as at the intersection of machine learning and topological data analysis. History has shown that most often the overlapping areas at intersections of seemingly disparate fields are key for the stimulation of new insights and further advances. This is particularly true for the extremely broad field of machine learning.

Grabbing Power Tanya M Kerssen 2013-01-08 Grabbing Power explores the history of agribusiness and land conflicts in Northern Honduras focusing on the Aguán Valley, where peasant movements battle large palm oil producers for the right to land. In the wake of a military coup that overthrew Honduran president Manuel Zelaya in June 2009, rural communities in the Aguán have been brutally repressed, with over 60 people killed in just over two years. United States military aid--spent in the name of the War on Drugs--fuels the Honduran government's ability to repress its people. A strong and inspiring movement for land, food and democracy has grown over the last two years, and it shows no sign of backing down.
