The Construction of Authorship Martha Woodmansee 1994 What is an author? What is a text? At a time when the definition of "text" is expanding and the technology whereby texts are produced and disseminated is changing at an explosive rate, the ways "authorship" is defined and rights conferred upon authors must also be reconsidered. This volume argues that contemporary copyright law, rooted as it is in a nineteenth-century Romantic understanding of the author as a solitary creative genius, may be inapposite to the realities of cultural production. Drawing together distinguished scholars from

literature, law, and the social sciences, the volume explores the social and cultural construction of authorship as a step toward redefining notions of authorship and copyright for today's world. These essays, illustrating cultural studies in action, are aggressively interdisciplinary and wide-ranging in topic and approach. Questions of collective and collaborative authorship in both contemporary and early modern contexts are addressed. Other topics include moral theory and authorship; copyright and the balance between competing interests of authors and the public; problems of international copyright; musical sampling and its impact on "fair use" doctrine; cinematic authorship; quotation and libel; alternative views of authorship as exemplified by nineteenth-century women's clubs and by the Renaissance commonplace book; authorship in relation to broadcast media and to the teaching of writing; and the material dimension of authorship as demonstrated by Milton's publishing contract. including one made of ice, another that takes refuge in the General Post Office, and a fire-breathing monster that flies out of an enchanted book and eats an entire soccer team! The Book of Beasts (Excerpt) He happened to be building a Palace when the news came, and he left all the bricks kicking about the floor for Nurse to clear up-but then the news was rather remarkable news. You see, there was a knock at the front door and voices talking downstairs, and Lionel thought it was the man come to see about the gas, which had not been allowed to be lighted since the day when Lionel made a swing by tying his skipping rope to the gas bracket. And then, quite suddenly, Nurse came in and said, ""Master Lionel, dear, they've come to fetch you to go and be King."" Then she made haste to change his smock and to wash his face and hands and brush his hair, and all the time she was doing it Lionel kept wriggling and fidgeting...

Big Data Is Not a Monolith Cassidy R. Sugimoto 2016-10-21 Perspectives on the varied challenges posed by big data for health, science, law, commerce, and politics. Big data is ubiquitous but heterogeneous. Big data can be used to tally clicks and traffic on web pages, find patterns in stock trades, track consumer preferences, identify linguistic correlations in large corpuses of texts. This book examines big data not as an undifferentiated whole but contextually, investigating the varied challenges posed by big data for health, science, law, commerce, and politics. Taken together, the chapters reveal a complex set of problems, practices, and policies. The advent of big data methodologies has challenged the theory-driven approach to scientific knowledge in favor of a data-driven one. Social media platforms and self-tracking tools change the way we see ourselves and others. The collection of data by corporations and government threatens privacy while promoting transparency. Meanwhile, politicians, policy makers, and ethicists are ill-prepared to deal with big data's ramifications. The contributors look at big data's effect on individuals as it exerts social control through monitoring, mining, and manipulation; big data and society, examining both its empowering and its constraining effects; big data and science, considering issues of data governance, provenance, reuse, and trust; and big data and organizations, discussing data responsibility, "data harm," and decision making. Contributors Ryan Abbott, Cristina Alaimo, Kent R. Anderson, Mark Andrejevic, Diane E. Bailey, Mike Bailey, Mark Burdon, Fred H. Cate, Jorge L. Contreras, Simon DeDeo, Hamid R. Authors and Owners Mark Rose 1995-08-11 The notion of the author as the creator and therefore the first owner of a work is deeply rooted both in our economic system and in our concept of the individual. But this concept of authorship is modern. Mark Rose traces the formation of copyright in eighteenth-century Britain—and in the process highlights still current issues of intellectual property. *Authors and Owners* is at once a fascinating look at an important episode in legal history and a significant contribution to literary and cultural history.
