Visiting Mrs Nabokov And Other Excursions Martin Amis 2010-12-23

Fuelled by innumerable cigarettes, Martin Amis provides dazzling portraits of contemporaries and mentors alike: Larkin and Rushdie; Greene and Pritchett; Ballard and Burgess and Nicholson Baker; John Updike - warts and all. Vigorously zipping across to Washington, he exposes the double-think of nuke-speak; in New Orleans the Republican Convention gets a going over. And then there's sport: he visits the world of darts and its disastrous attempt to clean itself up; dirty tricks in the world of chess; and some brisk but vicious poker with Al Alvarez and David Mamet. Sex without Madonna, expulsion from school, a Stones gig that should have been gagged, on set with Robocop or on court with Gabriela Sabatini, this is Martin Amis at his electric best.

When Alice Lay Down With Peter Margaret Sweatman 2011-01-28 When Alice Lay Down with Peter is a sweeping, magical novel that follows four generations of the McCormack family through more than a century of Canadian history, as it unfolds on the flood plains of southern Manitoba. The story of Alice and Peter McCormack and their progeny is a glorious, witty, and intimate epic that truly reminds us that life stories not only include the details of the past, but also expand into the present and future, encompassing much more than the statistics of life and death would seem to admit. Narrated by Blondie McCormack--Alice and Peter's daughter, who has just died at the age of 109--When Alice Lay Down with Peter is a novel that rejoices in the inevitability of change, and in the hauntings that reward our choosing to remember our own history. Just as When Alice Lay Down with Peter is a story of a family, it is a story of a particular place over time. Margaret Sweatman's characters are never separate from the story of the land itself, or from the natural and political events that work away at its edges. The history of the McCormacks is a history of life on the land: of bountiful crops and devastating floods, the renewal of spring and the death that marks each fall. It is in the connection between the place and its inhabitants that we find the deceptively simple meaning of "home." And it is to this conjoining of histories that Sweatman brings the lightning spark of her imagination, and out of which this wonderful novel has been born.

Piano Lessons Anna Goldsworthy 2011-01-22 In this remarkable memoir, Anna Goldsworthy recalls her first steps towards a life in music, from childhood piano lessons with a local jazz muso to international success as a concert pianist. As she discovers passion and ambition, and confronts doubt and disappointment, she learns about much more than tone and technique. This is a story of the getting of wisdom, tender and bittersweet. With wit and affection, Goldsworthy captures the hopes and uncertainties of youth, the fear and exhilaration of performing, and the complex bonds between teacher and student. An unforgettable cast of characters joins her: her family; her friends and rivals; and her teacher, Mrs Sivan, who inspires and challenges her in equal measure, and who transforms what seems an impossible dream into something real and sustaining.

Calculus James Stewart 2003-05 Once again keeping a keen ear to the needs of the evolving calculus community, Stewart created this text at the suggestion and with the collaboration of professors in the mathematics department at Texas A&M University. With an early introduction to vectors and vector functions, the approach is ideal for engineering students who use vectors early in their curriculum. Stewart begins by introducing vectors in Chapter 1, along with their basic operations, such as addition, scalar multiplication, and dot product. The

definition of vector functions and parametric curves is given at the end of Chapter 1 using a two-dimensional trajectory of a projectile as motivation. Limits, derivatives, and integrals of vector functions are interwoven throughout the subsequent chapters. As with the other texts in his Calculus series, in *Early Vectors* Stewart makes us of heuristic examples to reveal calculus to students. His examples stand out because they are not just models for problem solving or a means of demonstrating techniques - they also encourage students to develop an analytic view of the subject. This heuristic or discovery approach in the examples give students an intuitive feeling for analysis.

Twenty Miles Cara Hedley 2007 Isabel Norris has never left the ice. Her father was a hockey legend who died before she was born, and her grandparents have raised her in his skates. When Iz leaves her grandmother behind to play for the Winnipeg University Scarlets, she struggles to fit in on this team of hard-hitting, tough-talking women with a penchant for buffets, beer bong and raunchy humour - and a fierce loyalty to one another and to their sport. But in their raucous midst, Iz can't quite find her own place in the game. As she moves between the rowdy hilarity of the Scarlets' dressing room and quiet, lyrical contemplations, Iz tries to navigate the ways loss plays out on the ice. Based largely on author Cara Hedley's three seasons on the University of Manitoba Bison, *Twenty Miles* celebrates women's hockey and offers an uncompromising look at the ways in which the sport both haunts and redeems the women who play it.

A wolf tree is a tree in a bush or a thicket which is different in shape from those around it; a tree whose broader trunk and spreading branches indicate that it once grew alone but is now surrounded. Alison Calder's poems shine the light of a poet's curiosity on all manner of natural occurrences, which nevertheless stand out. The book opens with an examination of the extreme forms this nature may take - from the Dutch legend of the false child Sooterkin, to two-headed calves, Zip the Pinhead, and other medical curiosities, particularly those captured by 19th century photographic techniques. The disquieting feelings created by these subjects persist, causing the reader to proceed watchfully, even when the poet's attention switches to more common themes and images - plastic clotheslines, wildflowers of western Canada, snow geese, the Porta Nigra in Trier, Germany. A selection of poems from this manuscript received the Bronwen Wallace Memorial Award for writing excellence by a writer under the age of 35. A section of this manuscript, *Sexing the Prairie*, was published in the journal *Open Letter* in Fall 2006.

Mural Mahmoud Darwish 2017-08-01 Poetry from former national poet of Palestine, illustrated by original drawings by John Berger Mahmoud Darwish was the Palestinian national poet. One of the greatest poets of the last half century, his work evokes the loss of his homeland and is suffused with the pain of dispossession and exile. His poems display a brilliant acuity, a passion for and openness to the world and, above all, a deep and abiding humanity. Here, his close friends John Berger and Rema Hammami present a beautiful new translation of two of Darwish's later works. Illustrated with original drawings by John Berger, *Mural* is a testimony to one of the most important and powerful poets of our age.

The Construction of Homosexuality David F. Greenberg 2008-10-29 "At various times, homosexuality has been considered the noblest of loves, a horrible sin, a psychological condition or grounds for torture and execution. David F. Greenberg's careful, encyclopedic and important new book argues that homosexuality is only deviant because society has constructed, or defined, it as deviant. The book takes us over vast terrains of example and detail in the history of homosexuality."—Nicholas B. Dirks, *New York Times Book Review*

High Performance Web Sites Steve Souders 2007-09-11 Want your web site to display more quickly? This book presents 14 specific rules that will cut 25% to 50% off response time when users request a page. Author Steve Souders, in his job as Chief Performance Yahoo!, collected these best practices while optimizing some of the most-visited pages on the Web. Even sites that had already been highly optimized, such as Yahoo! Search and the Yahoo! Front Page, were able to benefit from these surprisingly simple performance guidelines. The rules in *High*

Performance Web Sites explain how you can optimize the performance of the Ajax, CSS, JavaScript, Flash, and images that you've already built into your site -- adjustments that are critical for any rich web application. Other sources of information pay a lot of attention to tuning web servers, databases, and hardware, but the bulk of display time is taken up on the browser side and by the communication between server and browser. High Performance Web Sites covers every aspect of that process. Each performance rule is supported by specific examples, and code snippets are available on the book's companion web site. The rules include how to: Make Fewer HTTP Requests Use a Content Delivery Network Add an Expires Header Gzip Components Put Stylesheets at the Top Put Scripts at the Bottom Avoid CSS Expressions Make JavaScript and CSS External Reduce DNS Lookups Minify JavaScript Avoid Redirects Remove Duplicates Scripts Configure ETags Make Ajax Cacheable If you're building pages for high traffic destinations and want to optimize the experience of users visiting your site, this book is indispensable. "If everyone would implement just 20% of Steve's guidelines, the Web would be adramatically better place. Between this book and Steve's YSlow extension, there's reallyno excuse for having a sluggish web site anymore." -Joe Hewitt, Developer of Firebug debugger and Mozilla's DOM Inspector "Steve Souders has done a fantastic job of distilling a massive, semi-arcane art down to a set of concise, actionable, pragmatic engineering steps that will change the world of web performance." -Eric Lawrence, Developer of the Fiddler Web Debugger, Microsoft Corporation

Loving Graham Greene Gloria Emerson 2010-12-22 This marvelous debut novel by former New York Times correspondent and National Book Award--winner Gloria Emerson is a witty and deeply affecting portrait of the stubborn hopes and disillusionment of a privileged woman who dreams of making a difference in the world. The polite correspondence she shares with the novelist Graham Greene inspires Molly Benson to see him as her moral guiding light. After his death in 1991, Molly sets out to honor his memory by going on a mission with two friends to Algeria at the start of that nation's brutal civil war, intending to save intellectuals from Islamic fundamentalist hit squads. But nothing in her genteel existence has prepared her for the perilous journey on which she and her humble delegation are about to embark.

Gay and Lesbian Identity Richard R. Troiden 1988 In the past twelve years, research into homosexuality has undergone a major shift in emphasis. A concern with documenting the etiology, treatment, and psychological adjustment of homosexuals has been replaced by an interest in understanding how people develop homosexual identities--that is, organized perceptions of themselves as homosexuals in relation to sexual and romantic settings. People are not born with perceptions of themselves as homosexual, bisexual, or heterosexual. Sexual identities evolve slowly, over a long period of time. This book develops an ideal-typical model of homosexual identity formation that represents a synthesis of, and elaboration on, previous theorizing and research on the subject. The model draws heavily upon accounts provided by homosexuals themselves. The model developed is unique in four major ways: it is grounded in current research and theory; it describes identity formation in both lesbians and gay males; it notes similarities as well as differences between the sexes in homosexual identity development; and it explains differences between gay males and lesbians in terms of their experiences with gender-role socialization. This is the first book to differentiate analytically the constructs of self, self-concept, identity, and homosexual identity within a unified theoretical framework. With one major exception, these conceptual distinctions have not been drawn in previous discussions of homosexual identity, and this lack has contributed to conceptual disarray. The theoretical approach adopted here is symbolic interactionism, a social-psychological perspective within the discipline of sociology. There is a sharp disagreement among theorists about the nature and meaning of homosexual identities. Do homosexuals' identities represent a confusion of being with doing, the mistaken belief that one is what one does, the equation of the entire self

with one type of behavior? Do homosexual identities represent one of several major interests that are constructed socially and defined as reflecting essential facets of personality?

Essential Calculus: Early Transcendentals James Stewart 2012-01-20 This book is for instructors who think that most calculus textbooks are too long. In writing the book, James Stewart asked himself: What is essential for a three-semester calculus course for scientists and engineers? ESSENTIAL CALCULUS: EARLY TRANSCENDENTALS, Second Edition, offers a concise approach to teaching calculus that focuses on major concepts, and supports those concepts with precise definitions, patient explanations, and carefully graded problems. The book is only 900 pages--two-thirds the size of Stewart's other calculus texts, and yet it contains almost all of the same topics. The author achieved this relative brevity primarily by condensing the exposition and by putting some of the features on the book's website, www.StewartCalculus.com. Despite the more compact size, the book has a modern flavor, covering technology and incorporating material to promote conceptual understanding, though not as prominently as in Stewart's other books. ESSENTIAL CALCULUS: EARLY TRANSCENDENTALS features the same attention to detail, eye for innovation, and meticulous accuracy that have made Stewart's textbooks the best-selling calculus texts in the world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Sounds Like Teen Spirit Tim English 2007-10 "A fun read that'll have you replaying the songs in your mind and on your stereo." -Chicago Tribune Have you ever listened to a new song and felt as if you'd heard it before? It's not your imagination. Melodies are "borrowed," consciously or subconsciously, more than you might think. For instance, do you know: That U2's "Beautiful Day" shares part of its tune with an a-ha hit from the eighties? Why Huey Lewis was so upset when he first heard Ray Parker Jr.'s "Ghostbusters"? How John Lennon's classic "Imagine" bears an uncanny resemblance to a novelty record cut by his dad? Sounds Like Teen Spirit tells the fascinating true stories behind these and many other "sound-alike" songs. Showcasing well-known artists from the Beatles to Kraftwerk, the Staple Singers to U2, it's a virtual catalog of pop music's "secret history" for casual and hardcore rock-and-roll fans alike. With this entertaining and informative guide, you'll be surprised by the tremendously varied musical influences on your favorite songwriters and performers, and you'll develop a genuine appreciation for what it takes to create a melody that is comfortable and pleasing and yet fresh and original.
