From this foundation, the host should consider the facets which make a particular situation unique, and fi-om there, use imagination to design a memorable occasion. The most important consideration in planning should always be the comfort of one's guests. The Stones of Athens Richard Ernest Wycherley 2015-03-08 Interpreting the monuments of Athens in light of literature, R. E. Wycherley brings before us the city the ancients knew. Philosophers, statesmen, travelers, dramatists, poets, private citizens—the words of all these suggest how the city looked at various periods, how its monuments came to be built, and how they served the people in daily life. Professor Wycherley concentrates on the classical period, illustrating his work with plans, reconstructions, and photographs. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. The Fleet at Flood Tide James D. Hornfischer 2016-10-25 NEW YORK TIMES BESTSELLER • The extraordinary story of the World War II air, land, and sea campaign that brought the U.S. Navy to the apex of its strength and marked the rise of the United States as a global superpower Winner, Commodore John Barry Book Award, Navy League of the United States • Winner, John Lehman Distinguished Naval Historian Award, Naval Order of the United States With its thunderous assault on the Mariana Islands in June 1944, the United States crossed the threshold of total war. In this tour de force of dramatic storytelling, distilled from extensive research in newly discovered primary sources, James D.

Hornfischer brings to life the campaign that was the fulcrum of the drive to compel Tokyo to surrender—and that forever changed the art of modern war. With a close focus on high commanders, front-line combatants, and ordinary people, American and Japanese alike, Hornfischer tells the story of the climactic end of the Pacific War as has never been done before. Here are the epic seaborne invasions of Saipan, Tinian, and Guam, the stunning aerial battles of the Great Marianas Turkey Shoot, the first large-scale use of Navy underwater demolition teams, the largest banzai attack of the war, and the daring combat operations large and small that made possible the strategic bombing offensive culminating in the atomic strikes on Hiroshima and Nagasaki. From the seas of the Central Pacific to the shores of Japan itself, *The Fleet at Flood Tide* is a stirring, authoritative, and cinematic portrayal of World War II's world-changing finale. Illustrated with original maps and more than 120 dramatic photographs "Quite simply, popular and scholarly military history at its best."—Victor Davis Hanson, author of *Carnage and Culture* "The dean of World War II naval history . . . In his capable hands, the story races along like an intense thriller. . . .

Narrative nonfiction at its finest—a book simply not to be missed."—James M. Scott, *Charleston Post and Courier* "An impressively lucid account . . . admirable, fascinating."—*The Wall Street Journal* "An extraordinary memorial to the courageous—and a cautionary note to a world that remains unstable and turbulent today."—Admiral James Stavridis, former Supreme Allied Commander, NATO, author of *Sea Power* "A masterful, fresh account . . . ably expands on the prior offerings of such classic naval historians as Samuel Eliot Morison."—*The Dallas Morning News*

A Military Guide to Terrorism in the Twenty-First Century Training and Doctrine Command 2007-08-01 "A Military Guide to Terrorism in the Twenty-First Century" is a capstone reference guide prepared under the direction of the U.S. Army Training and Doctrine Command (TRADOC), TRADOC G2 as a capstone reference guide on terrorism. This guide addresses foreign and domestic threats against the United States of America in a contemporary operational environment (COE). This informational handbook supports institutional training, professional military education, and operational missions for U.S. military forces in the War on Terrorism (WOT). This document provides an introduction to the nature of terrorism and recognition of terrorist threats to U.S. military forces. A common situational awareness by U.S. military forces considers three principal venues for armed forces: forces that are deployed, forces that are in transit to or from an operational mission, and forces that are primarily installation or institution support. Neither a counterterrorism directive nor antiterrorism manual, this handbook complements but does not replace Army training and intelligence products on terrorism. A selected bibliography presents citations for detailed study of specific terrorism topics.

Critical Essays Jean-Paul Sartre 2017 Critical Essays (Situations I) contains essays on literature and philosophy from a highly formative period of French philosopher and leading existentialist Jean-Paul Sartre's life, the years between 1938 and 1946. This period is particularly interesting because it is before Sartre published the magnum opus that would solidify his name as a philosopher, *Being and Nothingness*. Instead, during this time Sartre was emerging as one of France's most promising young novelists and playwrights--he had already published *Nausea*, *The Age of Reason*, *The Flies*, and *No Exit*. Not content, however, he was meanwhile consciously attempting to revive the form of the essay via detailed examinations of writers who were to become central to European cultural life in the immediate aftermath of World

War II. Collected here are Sartre's experiments in reimagining the idea and structure of the essay. Among the distinguished writers he analyzes are Francis Ponge, Georges Bataille, Vladimir Nabokov, Maurice Blanchot, and, of course, Albert Camus, whose novel *The Stranger* Sartre endeavours to explain in these pages. *Critical Essays (Situations I)* also contains a famous attack on the Catholic novelist François Mauriac, studies of the great American literary iconoclasts Faulkner and Dos Passos, and brief but insightful essays on aspects of the philosophical writings of Husserl and Descartes. This new translation by Chris Turner reinvigorates the original skill and voice of Sartre's work and will be essential reading for fans of Sartre and the many writers and works he explores. "For my generation he has always been one of the great intellectual heroes of the twentieth century, a man whose insight and intellectual gifts were at the service of nearly every progressive cause of our time."--Edward Said

The Leader's Bookshelf Adm. James Stavridis USN (Ret.) 2017-03-21 "The Leader's Bookshelf" identifies the "Top 50" books that can help anyone become a better leader. The works selected were based on hundreds of interviews with the most senior active and retired four-star U.S. military leaders who identified books from which they gained the special insights which helped propel them to success in the most demanding leadership challenges. Each of those fifty works -- novels, memoirs, biographies, autobiographies, leadership works -- are concisely summarized and the key leadership lessons extracted and presented. Admiral Jim Stavridis and his co-author, R. Manning Ancell, have been surveying very senior military leaders for the past several years regarding their reading habits and favorite books. They have spoken to over 200 four-star officers, including those both currently on active duty and retired. Each of those admirals and generals was asked for a list of books that strongly influenced their leadership skills. Stavridis and Mancell then collated the data and analyzed which books were mentioned most frequently and which ones were most compelling in the leadership lessons offered the reader. The survey, while not scientific, was quite comprehensive. From it, Stavridis and Ancell built a powerful set of recommended readings. Whether individuals work their way through the entire top 50 list and read each book cover to cover, or read the summaries provided in "The Leader's Bookshelf" to determine which appeal to them most -- this book will provide a roadmap to better leadership. "The Leader's Bookshelf" highlights the value of reading for leaders in a philosophical and practical sense, provides advice on how to build an extensive library, lists other books worth reading to improve leadership skills, and analyzes how leaders use what they read to achieve their goals. "The Leader's Bookshelf" is a book for anyone who wants to improve their ability to lead -- whether in their family life, their professional endeavors, or within our society and civic organizations. *One Nation Under Drones* John E Jackson 2018-11-15 *One Nation Under Drones* is an interesting and informative review of how robotic and unmanned systems are impacting every aspect of American life, from how we fight our wars; to how we play; to how we grow our food. Edited by Professor John Jackson, who holds the E.A. Sperry Chair of Unmanned and Robotic Systems at the United States Naval War College, this highly readable book features chapters from a dozen experts, researchers, and operators of the sophisticated systems that have become ubiquitous across the nation and around the world. Press reports have focused primarily on Unmanned Aerial Vehicles, officially designated as UAVs, but more often referred to as drones. This book takes you behind the scenes and describes how Predators, Reapers, Scan Eagles and dozens of other pilotless aircraft have been used to fight the Global War on Terrorism. Although these systems seemed to emerge fully-developed into the skies above America's distant battlefields following the attacks of 9-11-2001, readers will discover how they actually trace their lineage to the First World War, when the automatic airplane/aerial torpedo, designed and built by the Sperry Gyroscope Company, made its first flight just over a century ago. Unmanned aircraft were used by various combatants in World War II, and took many forms: from converted manned bombers to inter-continental attacks on the American homeland by rice-paper balloons. Technology developed in the latter decades of the 20th century enabled crews stationed thousands of miles away to attack

targets on remote battlefields. Such long-range and remote-controlled weapons have been extensively used, but are controversial from both legal and ethical stand-points. Chapters written by international law specialists and drone pilots with advanced education in ethics address these issues from both sides of the argument. The book also details how robotic systems are being used on land, in and below the seas, and in civilian applications such as driverless cars. Three dozen photographs display drones as small as an insect up to those as large as a 737 airliner. One Nation Under Drones covers such a wide array of topics that it will be of interest to everyone from the casual reader seeking to know more about these systems, to national security professionals, both in and out of uniform, who will be making decisions about their procurement and use in decades to come. This work will become the definitive volume on the subject, providing the facts and avoiding the hype about systems that have moved off the pages of science fiction and into the environment all around us.
