*The Poetry Home Repair Manual* Ted Kooser 2007-03-01 Recently appointed as the new U. S. Poet Laureate, Ted Kooser has been writing and publishing poetry for more than forty years. In the pages of *The Poetry Home Repair Manual*, Kooser brings those decades of experience to bear. Here are tools and insights, the instructions (and warnings against instructions) that poets—aspiring or practicing—can use to hone their craft, perhaps into art. Using examples from his own rich literary oeuvre and from the work of a number of successful contemporary poets, the author schools us in the critical relationship between poet and reader, which is fundamental to what Kooser believes is poetry's ultimate purpose: to reach other people and touch their hearts. Much more than a guidebook to writing and revising poems, this manual has all the comforts and merits of a long and enlightening conversation with a wise and patient old friend—a friend who is willing to share everything he's learned about the art he's spent a lifetime learning to execute so well.

**Dana's Manual of Mineralogy** William E. Ford 2015-08-05 Excerpt from *Dana's Manual of Mineralogy: For the Student of Elementary Mineralogy, the Mining Engineer, the Geologist, the Prospector, the Collector, Etc* The "Manual of Mineralogy" was first published by James Dwight Dana in 1848. A second edition was printed in 1850 and a "New Edition," which had been revised and enlarged, was published in 1857. The book was rearranged and rewritten for the third edition which appeared in 1878. This edition included an extensive chapter on rocks, and the title of the book was changed to "Manual of Mineralogy and Petrography." The fourth and last revision was published in 1887. Since that time the book has been frequently reprinted, so that the last edition was the twelfth. But it is now twenty-five years since the last revision of the text. Believing that the Manual has amply proved its usefulness, and with the desire of keeping the series of the Dana Mineralogies complete, Professor Edward S. Dana asked the author to prepare a new and revised edition. It was found that it was desirable to rewrite the book, and consequently, as far as the text and figures are concerned, this present edition is almost wholly new. The scope and character of the book,

however, have been kept as nearly as possible the same. The book has been primarily designed to fill the ordinary needs of the elementary student of Mineralogy, the mining engineer, the geologist and the practical man who may be interested in the subject. It has been made brief and direct and the treatment has been as untechnical as possible. The chapter on Petrography has been omitted and only a brief and general description of the various important rock types given. This change was made in view of the fact that since 1887 the subject of Petrography has had so large a development as to render impossible its adequate treatment in a single chapter.
