Public Examinations Examined Thomas Kellaghan 2019-11-19 High-stakes public examinations exert a dominant influence in most

education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary

audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease"† takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to

prevent the assessment tail wagging the educational dog.†? Angela W. Little, Professor Emerita, Institute of Education, University College London “This book is very well structured and written and draws on the authors’ remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.†? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? Improving Quality in Education Bert P.M. Creemers 2013-07-03 This book explores an approach to school improvement that merges the traditions of educational effectiveness research and school improvement efforts. It displays how the dynamic model, which is theoretical and empirically validated, can be used in both traditions. Each chapter integrates evidence from international and national studies, showing how the knowledge-base of educational effectiveness research can be used for improvement purposes. In a clear and practicable manner it outlines: Foundations of the improvement approach Research projects

investigating the impact of the dynamic approach Guidelines and practical solutions to translating the approach into action Further developments for school improvement Exploring the crucial factors in the establishment of this environment, the authors outline a dynamic framework that helps schools collect data, through self-evaluation mechanisms, taking decisions about priorities for improvement, and developing appropriate policies and action plans. This approach emphasises educational targets and provides means to achieve them that are flexible enough to fit in with the circumstances of the individual school. The book draws upon research across the world, conducted especially in the United States, Europe, and Australasia, expertly showcasing how the dynamic approach can be used in a wide variety of educational settings A key book for all professionals working in education; academics, researchers, policy-makers, school advisors and practitioners will find it invaluable. Not only it is a must for

graduate students, university libraries, and individual academics but also for school management teams, school support agencies and officials in educational policy.

Concord in English Grammar. Problems and Recommendations for Senior High School

Students Justine Bakuuro 2020-09-14

Masterarbeit aus dem Jahr 2015 im Fachbereich Didaktik - Englisch - Pädagogik, Sprachwissenschaft, University of Education, Sprache: Deutsch, Abstract: The major problem investigated in this study is the difficulties senior high school students encounter in the use of concord in English grammar. The purpose of the study was to identify these concord learning challenges, find out why those challenges exist and find appropriate ways to help the students. The instruments used to collect data were intervention tests. The research design included pre-intervention, intervention and post-intervention. The study discovered that most of the students could not apply the rules of concord

correctly. They had very serious problems with subject-verb concord. Most students applied concord rules correctly to a very large extent after they were taken through the rules guiding concord in the intervention procedure. In conclusion, this research has proved that an intervention procedure is very important in assisting students to overcome their concord learning challenges.

Academic Literacy Development Laura-Mihaela Muresan 2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data

presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education. *Gale Directory of Publications and Broadcast Media* 2002 Identifies specific print and broadcast sources of news and advertising for trade, business, labor, and professionals.

Eight Perfect Hours Lia Louis 2021-09-28 "On a snowy evening in March, thirty-something Noelle Butterby is on her way back from an event at her old college when disaster strikes. With a blizzard closing off roads, she finds herself stranded, alone in her car, without food, drink, or a working charger for her phone. All seems lost until Sam Attwood, a handsome American stranger also trapped in a nearby car, knocks on her window and offers assistance. What follows is eight perfect hours together, until morning arrives and the roads finally clear. The two strangers part, positive they'll never see each other again but fate, it seems, has a different plan. As the two keep serendipitously bumping into one another, they begin to realize

that perhaps there truly is no such thing as coincidence." --back cover.

Education in Sierra Leone 2007 After a decade-long civil war, Sierra Leone witnessed an unprecedented surge in school enrollments at the primary and then the secondary levels. Committed to the Education for All objectives, the government further encouraged greater access to school. The country must now negotiate the transition from postwar recovery to regular delivery of education services. The main tasks ahead include reaching the remaining out-of-school children and improving the quality of the learning environment and, ultimately, of learning outcomes. Success will depend on the unrelenting, strong commitment of the government, the capacity of providers to effectively deliver education services, and a sustainable financial framework.

Daily Graphic Yaw Boadu-Ayeboafoh 2006-06-19 "The" Illustrated London News 1854 Federal Government of Nigeria Nigeria 2011 Teaching for Experiential Learning Scott D. Wurdinger 2009-12-16 This book describes how to change the way in which educators conduct business in the classroom. Our current educational systems lack ways to reach today's learners in relevant, meaningful ways. The five approaches in this book inspire and motivate students to learn. The authors provide in-depth descriptions into these overlapping approaches for experiential learning: active learning, problem-based learning, project-based learning, service learning, and place-based education. Each of these five approaches includes an element of student involvement and attempts to engage students in solving problems. The chapters are presented in a consistent, easy-to-read format that provides descriptions, history, research, ways to use the approach, and resources. This book will help educators

transform their classrooms into dynamic learning environments.

Dot, Line, Shape Victionary 2020-02-27 As much as skills and styles matter when it comes to design, every visual begins with a fundamental element that can be enhanced or expanded into an aesthetically pleasing and meaningful piece of work. Whether they serve as simple points of focus or building blocks for complex patterns, these elements present countless possibilities when combined with purpose and principles like contrast, balance, rhythm, and white space. Going back to basics, DOT, LINE, SHAPE is a comprehensive collection of projects that manifest the three elements in inspiring and ingenious ways to bring unique creative visions to life. No matter how trends or platforms change over time, they serve as timeless components that provide designers and artists around the world with infinite means of expression to make a lasting impact.

Influences of the IEA Civic and Citizenship Education Studies Barbara Malak-Minkiewicz 2021-05-26 This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also

discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly

important for many societies.

Connecting Lives and Learning Brenton Prosser
2010 CONNECTING LIVES AND LEARNING is a project dedicated to connecting learning to student lives, connecting teachers with the latest middle years research, and better connecting primary and secondary schools to keep students at school longer. Based in Adelaide's lower socio-economic northern urban fringe, the project helps teachers use students' everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks. This book tells the stories of real teachers, in real classrooms, making real attempts for change, and not always succeeding. It is a book about teachers making a difference in difficult times and tough places. But most importantly, this book reaffirms that being an educator is inherently about adopting socially just practices, building community capacity and contributing to a more socially sustainable world.

Introspection in Second Language Research

Claus Færch 1987 This book presents a new solution to one of the major methodological problems of second language research, the reconstruction of learners' processes of language learning and language use. Based on recent developments in cognitive psychology, the contributors to the volume demonstrate how introspective methods - verbal reports by learners about their thought processes - provide valuable information about central areas in second language research: cognitive comprehension, translation and test-taking.

Curriculum Overload A Way Forward OECD

2020-11-25 Schools are constantly under pressure to keep up with the pace of changes in society. In parallel, societal demands for what schools should teach are also constantly changing; often driven by political agendas, ideologies, or parental pressures, to add global competency, digital literacy, data literacy, environmental literacy, media literacy, social-

emotional skills, etc. This "curriculum expansion" puts pressure on policy makers and schools to add new contents to already crowded curriculum.

Vocationalisation of Secondary Education

Revisited Jon Lauglo 2006-03-30 The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on

'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

School Accountability Williamson M. Evers 2002 Scholars from history, economics, political science, and psychology describe the present state of school accountability, how it evolved, how it succeeded and failed, and how it can be improved. They review the history behind the ongoing conflict between educators and policymakers over accountability and testing, describe various accountability schemes, and analyze the costs of accountability. Case studies of three states with strong school systems compare how accountability works in practice.
