Digital Anatomy Jean-François Uhl 2021-05-14 This book offers readers fresh insights on applying Extended Reality to Digital Anatomy, a novel emerging discipline. Indeed, the way professors teach anatomy in classrooms is changing rapidly as novel technology-based approaches become ever more accessible. Recent studies show that Virtual (VR), Augmented (AR), and Mixed-Reality (MR) can improve both retention and learning outcomes. Readers will find relevant tutorials about three-dimensional reconstruction techniques to perform virtual dissections. Several chapters serve as practical manuals for students

and trainers in anatomy to refresh or develop their Digital Anatomy skills. We developed this book as a support tool for collaborative efforts around Digital Anatomy, especially in distance learning, international and interdisciplinary contexts. We aim to leverage source material in this book to support new Digital Anatomy courses and syllabi in interdepartmental, interdisciplinary collaborations. Digital Anatomy - Applications of Virtual, Mixed and Augmented Reality provides a valuable tool to foster cross-disciplinary dialogues between anatomists, surgeons, radiologists, clinicians, computer scientists, course designers, and industry practitioners. It is the result of a multidisciplinary exercise and will undoubtedly catalyze new specialties and collaborative Master and Doctoral level courses world-wide. In this perspective, the UNESCO Chair in digital anatomy was created at the Paris Descartes University in 2015

(www.anatomieunesco.org). It aims to federate the education of anatomy around university partners from all over the world, wishing to use these new 3D modeling techniques of the human body.

The Company I Keep Leonard A. Lauder 2020-11-17 In his much-anticipated memoir, *The Company I Keep: My Life in Beauty*, Chairman Emeritus and former CEO of The Estée Lauder Companies Leonard A. Lauder shares the business and life lessons he learned as well

as the adventures he had while helping transform the mom-and-pop business his mother founded in 1946 in the family kitchen into the beloved brand and ultimately into the iconic global prestige beauty company it is today. In its infancy in the 1940s and 50s, the company comprised a handful of products, sold under a single brand in just a few prestigious department stores across the United States. Today, The Estée Lauder Companies constitutes one of the world's leading manufacturers and marketers of prestige skin care, makeup, fragrance and hair care products. It comprises more than 25 brands, whose products are sold in over 150 countries and territories. This growth and success was led by Leonard A. Lauder, Estée Lauder's oldest son, who envisioned and effected this expansion during a remarkable 60-year tenure, including leading the company as CEO and Chairman. In this captivating personal account complete with great stories as

only he can tell them, Mr. Lauder, now known as The Estée Lauder Companies' "Chief Teaching Officer," reflects on his childhood, growing up during the Great Depression, the vibrant decades of the post-World War II boom, and his work growing the company into the beauty powerhouse it is today. Mr. Lauder pays loving tribute to his mother Estée Lauder, its eponymous founder, and to the employees of the company, both past and present, while sharing inside stories about the company, including tales of cutthroat rivalry with Charles Revson of Revlon and others. The book offers keen insights on honing ambition, leveraging success, learning from mistakes, and growing an international company in an age of economic turbulence, uncertainty, and fierce competition.

3D Laser Scanning for Heritage Clive Boardman 2018

The first edition of 3D Laser
 Scanning for Heritage was
 published in 2007 and
 originated from the Heritage3D
 project that in 2006 considered
 the development of
 professional guidance for laser
 scanning in archaeology and
 architecture. Publication of the
 second edition in 2011
 continued the aims of the
 original document in providing
 updated guidance on the use of
 three-dimensional (3D) laser
 scanning across the heritage
 sector. By reflecting on the
 technological advances made
 since 2011, such as the speed,
 resolution, mobility and
 portability of modern laser
 scanning systems and their
 integration with other sensor
 solutions, the guidance
 presented in this third edition
 should assist archaeologists,

conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Caring for People who Sniff Petrol Or Other Volatile Substances National Health and Medical Research Council (Australia) 2011 These guidelines provide recommendations that outline the critical aspects of infection prevention and control. The recommendations were developed using the best available evidence and consensus methods by the Infection Control Steering Committee. They have been prioritised as key areas to prevent and control infection in

a healthcare facility. It is recognised that the level of risk may differ according to the different types of facility and therefore some recommendations should be justified by risk assessment. When implementing these recommendations all healthcare facilities need to consider the risk of transmission of infection and implement according to their specific setting and circumstances.

Nature Inside Penny Sparke
2021-02-02 The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary "living walls" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, *Nature Inside* explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior

through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant.

A Foodie Afloat Di Murrell
2020-07-28 A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along

the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A Foodie Afloat is the 2020 UK winner of the World Gourmand Cookbook Awards in the Food Tourism category.
