Safety at Street Works and Road Works Great Britain: Department for Transport 2013-10-01 This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way

working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

Work Worth Doing Brian T. McMahon 2021-05-30 President Theodore Roosevelt once said, "Far and away the best prize that life offers is the chance to work hard at work worth doing." This quote is not only the source from which the title was borne, but also the philosophical approach toward TBI rehabilitation embraced by the 26 rehabilitation experts who wrote *Work Worth Doing: Advances in Brain Injury Rehabilitation*. This important, and possibly controversial, book of issues and methods addresses the full spectrum of vocational rehabilitation activities. Independent living, treatment generalization, criteria for evaluating TBI rehabilitation facilities, family involvement issues, and an entirely new perspective on the TBI rehabilitation industry are discussed.
