[The Illusions of Time](#) Valtteri Arstila 2019-09-26 This edited collection presents the latest cutting-edge research in the philosophy and cognitive science of temporal illusions. Illusion and error have long been important points of entry for both philosophical and psychological approaches to understanding the mind. Temporal illusions, specifically, concern a fundamental feature of lived experience, temporality, and its relation to a fundamental feature of the world, time, thus providing invaluable insight into investigations of the mind and its relationship with the world. The existence of temporal illusions crucially challenges the naïve assumption that we can simply infer the temporal nature of the world from experience. This anthology gathers eighteen original papers from current leading researchers in this subject, covering four broad and interdisciplinary topics: illusions of temporal passage, illusions and duration, illusions of temporal order and simultaneity, and the relationship between temporal illusions and the cognitive representation of time.

Conceptualizing the Regulatory Thicket Shen Wei 2022-04-29 This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China's financial market after the global financial crisis. The book provides an in-depth analysis of China's contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China's banks into more market-oriented institutions and increased public sector growth. However, China's financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China's financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese government achieves its political and economic objectives. More fundamentally, according to the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China's financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.

Resilient Sustainable Cities Leonie Pearson 2014-01-10 Urbanization is occurring at an unprecedented rate; by 2050 three quarters of the world's people will live in urban environments. The cars we drive, products we consume, houses we live in and technology we use will all determine how sustainable our cities will be. Bridging the increasing divide between cross-disciplinary academic insights and the latest practical innovations, Resilient Sustainable Cities provides an integrated approach for long term future planning within the context of the city as a whole system. In the next 30 years cities will face their biggest challenges yet, as a result of long term, or 'slow burn' issues: population growth will stretch to the breaking point urban infrastructure and service capacity; resource scarcity, such as peak oil; potable water and food security, will dramatically change what we consume and how; environmental pressures will change how we live and where and; shifting demographic preferences will exacerbate urban pressures. Cities can't keep doing what they've always done and cope - we need to change current urban development to achieve resilient, sustainable cities. Resilient Sustainable Cities provides practical and conceptual insights for practitioners, researchers and students on how to deliver cities which are resilient to 'slow burn' issues and achieve sustainability. The book is organized around three overarching themes: pathways to the future innovation to deliver the future leadership and governance issues The book includes a variety of perspectives conveyed through international case studies and examples of cities that have transformed for a sustainable future, exploring their successes and failures to ensure that readers are left with ideas on how to turn their city into a resilient sustainable city for the future.

Ministry of Transportation. Electrical Engineering Section 1989 Gay and Lesbian Identity Richard R. Troiden 1988 In the past twelve years, research into homosexuality has undergone a major shift in emphasis. A concern with documenting the etiology, treatment, and psychological adjustment of homosexuals has been replaced by an interest in understanding how people develop homosexual identities-that is, organized perceptions of themselves as homosexuals in relation to sexual and romantic settings. People are not born with perceptions of themselves as homosexual, bisexual, or heterosexual. Sexual identities evolve slowly, over a long period of time. This book develops an ideal-typical model of homosexual identity formation that represents a synthesis of, and elaboration on, previous theorizing and research on the subject. The model draws heavily upon accounts provided by homosexuals themselves. The model developed is unique in four major ways: it is grounded in current research and theory; it describes identity formation in both lesbians and gay males; it notes similarities as well as differences between the sexes in homosexual identity development; and it explains differences between gay males and lesbians in terms of their experiences with gender-role socialization. This is the first book to differentiate analytically the constructs of self, self-concept, identity, and homosexual identity within a unified theoretical framework. With one major exception, these conceptual distinctions have not been drawn in previous discussions of homosexual identity, and this lack has contributed to conceptual disarray. The theoretical approach adopted here is symbolic interactionism, a social-psychological perspective within the discipline of sociology. There is a sharp disagreement among theorists about the nature and meaning of homosexual identities. Do homosexuals' identities represent a confusion of being with doing, the mistaken belief that one is what one does, the equation of the entire self with one type of behavior? Do homosexual identities represent one of several major interests that are constructed socially and defined as reflecting essential facets of personality?

Dr. Jamie Turndorf . . . provides stunning evidence of the continuity of love and life, along with the tools to help anyone connect with those in the unseen world." — Suzanne Giesemann, author of *Messages of Hope* Famed relationship therapist, author, and media personality Dr. Jamie Turndorf—known worldwide as Dr. Love—shares the amazing true story of her spiritual reconnection with her beloved deceased husband, internationally renowned former Jesuit priest Emile Jean Pin. Discovering for herself that relationships don't end in death, Jamie recounts her remarkable experience where, through the depths of her grief after Jean's sudden passing, her husband made his continued presence—and undying love—known. The result: an unprecedented method that enables the bereaved to reconnect, resolve unfinished business, and make peace with the deceased. Come to recognize the numerous signs from spirit that you may have been missing. Learn to trust yourself and the process that's right for you—not a shortened, artificial grief period prescribed by conventional doctors. [Bloody Foreigners](#) Robert Winder 2010-11-04 Immigration is one of the most important stories of modern British life, yet it has been happening since Caesar first landed in 53 BC. Ever since the first Roman, Saxon, Jute and Dane leaped off a boat we have been a mongrel nation. Our roots are a tangled web. From Huguenot weavers fleeing French Catholic persecution in the 18th century to South African dentists to Indian shopkeepers; from Jews in York in the 12th century (who had to wear a yellow star to distinguish them and who were shamefully expelled by Edward I in 1272) to the Jamaican who came on board the Windrush in 1947. The first Indian MP was elected in 1892, Walter Tull, the first black football player played (for Spurs and Northampton) before WW1 (and died heroically fighting for the allies in the last months of the war); in 1768 there were 20,000 black people in London (out of a population of 600,000 - a similar percentage to today). The 19th century brought huge numbers of Italians, Irish, Jews (from Russia and Poland mainly), Germans and Poles. This book draws all their stories together in a compelling narrative.
