Terrier-centric Dog Training

Dawn Antoniak-Mitchell 2012-07 Train a terrier!? It can be done but... All kinds of dogs have a number of hard-wired traits bred into them. Hounds love to follow their noses, Retrievers love to fetch and Herding dogs love to herd. With few exceptions, these are pretty harmless activities and don't stand in the way of training. Terriers, however, were bred to hunt and kill vermin independently, digging

underground and barking excitedly, almost impervious to pain. Let's see...just a few challenges to overcome in training: strong prey drive, independence, feistiness, digging, barking, the list goes on. In *Terrier-Centric Dog Training*, author Dawn Antoniak-Mitchell takes up the challenge to help terrier owners train their dogs by making sure they understand the instincts bred into terriers and what the most effective training and management techniques are to use when working with a "natural born killer." You can train your terrier, but just don't let him loose off-leash in a park full of squirrels! Learn to: Make yourself the most important thing in your terrier's world to keep his attention and focus on you. Reward your terrier by allowing him to engage in behaviors he wants to do in exchange for doing what you want him to first. Help your touch-sensitive terrier become comfortable while being handled and groomed. Identify your terrier's "bubble," the

space within which he is likely to become reactive toward people, other dogs and whatever else he views as distractions. Recognize what you can and cannot expect from a terrier in terms of trainability-being realistic is very important. What experts are saying about Terrier-Centric Dog Training So many dog trainers just don't "get" the terrier thing. To my absolute delight, Dawn "gets it." No excuses for terrier behavior, just facts and the best kind of advice for living with terriers and shaping them to behave as good citizens while respecting and understanding their terrier-ness. I was thrilled to see the emphasis she gives to teaching dogs to live safely with people and to be calm and happy with human interactions. And this is so important because so many trainers and owners are quite intimidated by the strong emotions and opinions that terriers bring to the table. The book's well explained and appropriate protocols show that you can indeed train a terrier-and if you

do, you can call yourself a dog trainer! Brenda Aloff, author *Aggression in Dogs and Puppy Problems? No Problem Anyone* who wants to connect with a terrier will find the keys right here. The way to a terrier's heart and mind is through his natural instincts. Ms. Antoniak-Mitchell has described the portal to reaching terriers and creating the perfect relationship that turns our favorite bad boys into well-behaved and beloved companions. Urban Dog Cis Frankel 2000
Owning a dog in the city has a completely different set of challenges than owning a dog in a rural or suburban setting. The city is full of distractions for your dog such as congestion, noise, crowds of people, cars, buses, bicycles, rollerbladers, trash, sewers, alleys, roadways and other dogs. Where you can exercise your dog is limited, and maneuvering a dog through city streets and across busy roadways is often hazardous. Rat poison sprinkled in

alleyways, garbage thrown on the sidewalk and around garbage bins, and city puddles filled with unknown substances are all threats to your dog's health. In this book, Cis Frankel, an urban dog trainer best known for training Oprah Winfrey's cocker spaniel, teaches owners what is proper dog etiquette in urban areas and explains how to deal with the specific difficulties of training and living with a dog in the city.

Training Dogs Konrad Most 2001 **Please note that Dogwise does not endorse all of the training methods used in this book; it is a historical document and an early example of modern dog training. Today's dog trainer can trace the roots of modern training to Training Dogs by Colonel Konrad Most. Written in Germany in 1910, Training Dogs influenced how both dogs and trainers were taught in Europe and the United States for the next 50 years! It contains valuable and historically significant information, a true classic. 21st century trainers and behaviorists will find it amazing to realize that early in the 20th century Konrad Most was using and applying behavioral training principles with dogs long before B.F. Skinner! Most also created systematic and scientific methods to teach trainers how to train dogs with his " Theory

of Training." While Most's methods may be viewed as harsh by modern dog trainers, the theory behind it was revolutionary for its time and it is still applied today. Discover the roots of behavioral training. Seeing the world from a dog's point of view. Utilizing instinctual behavior in training such as the prey drive. Use of compulsion and inducements. Use of primary and secondary reinforcers. Learn how Most Taught Obedience exercises including the recall, jumping and retrieving. Guard and schutzhund training. Reconnaissance and tracking; scent theory. Water work for hunting dogs. Dogs for the blind. Here is what today's dog trainers say about Training Dogs. Most demonstrated an understanding of operant conditioning concepts such as primary and secondary reinforcement, shaping, fading and chaining 28 years before the publication of B.F. Skinner's *The Behavior of Organisms*. He differentiated

between primary and secondary reinforcers. He used his voice and soft tones as secondary inducements, much the way some trainers use clicks today. Mary Burch & Jon S. Bailey authors of *How Dogs Learn*. Although some of Most's methods seem archaic and harsh in this enlightened age of positive training, some of the theory he set forth was years ahead of its time. Knowing where training came from helps us appreciate where we are today. Sheila Booth author of *Purely Positive Training* and co-author of *Schutzhund Obedience Training in Drive*. Konrad Most was a police dog, war dog and seeing-eye dog trainer in Germany for the first half of the 20th Century. He trained dogs in World Wars I AND II and created curricula for trainers. He was a researcher in the field of canine psychology and trained dogs for virtually every use during his long career.
