*The Assistant for Specifying the Quality Software (ASQS) User's Manual* 1990 The ASOS, (The Assistant for Specifying the Quality of Software) a knowledge base software tool, assists software acquisition managers which specify software quality requirements. In the consultation mode, questions are presented to the acquisition manager in terms

related to the mission area of interest. Answers are transformed by ASQS into tailored quantitative quality goals based on the thirteen software quality factors of RADC software quality framework. The current version supports the Intelligence and Satellite mission areas. ASQS serves the purpose of transitioning the software quality specification

methodology found in the RADC final report RADC-TR-85-37, Vol II (of three), Specification of Software Quality Attributes - Software Quality Specification Guidebook, into use in the DOD acquisition process. In so doing, it reduces the amount of time and the expertise required to specify meaningful software quality goals. It bridges the gap between software quality concepts and terminology and the system needs and terminology understood by the acquisition manager. (Author) (kr).

*The United States Government Manual* United States. Office of

the Federal Register 1981 *How To Prepare Defense-Related Scientific and Technical Reports* Walter W. Rice 2007-03-16 This book provides thorough and specific guidance on how to prepare defense-related scientific and technical reports, including classified scientific and technical reports. It includes an appendix describing the workings of the Defense Technical Information Center, the central repository for defense-related scientific and technical reports, and an appendix addressing tone and style, including pertinent information from the United States Government Printing Office Style Manual 2000, the official style guide of the U.S. Government and, therefore, the Department of Defense. Every facet of preparing defense-related scientific and technical reports is addressed, thereby making it unnecessary for the user to have to refer to the standards and numerous regulations pertaining to this subject. In effect, the book provides "one-stop shopping"

for the user. Also, some of the official guidance on preparing defense-related scientific and technical reports requires interpretation, and in those cases the book provides a prudent analysis of that information and prescribes a "best practices" course for the user.

A contracts specialist could pull out a huge binder and flip thru pages endlessly. Not only is it time consuming, but it is exhausting lugging around that huge binder. With this release, we got it down to 4 Volumes. Tried to keep subjects together in each one. Other companies publish the FAR in a single book (over 1,900 pages). Their book is around 6 inches by 9 inches and sells for over \$100! Many people need glasses to read and don't like books with small print. That's especially true of complex technical subjects like acquisition regulations. We print the hard copy books a full 8 1/2 inches by 11 inches, with large text. **Defense Acquisition System. An Executive Summary of DODD 5000.1, DODI 5000.2, and DOD Manual 5000.2**

Peter Starnell 1991 The issuance of DODD 5000.1, DODD 5000.2, and DOD Manual 5000.2, all dated February 23, 1991 represents a major change in the statement of DOD acquisition policies and procedures. Motivated by numerous acquisition

initiatives that have resulted primarily from recent legislation and the Defense Management Report to the President, these documents consolidate and integrate acquisition policies, authorities, responsibilities, and procedures while further standardizing documentation formats. The principal thrust of these documents is the establishment of a disciplined approach for integrating the Department's requirements generation; acquisition management; and planning, programming, and budgeting systems.

1997 This Manual is issued under the authority of, and in accordance with, DoD Instruction 4145.26, "DoD Contractors Safety Requirements for Ammunition and Explosives," April 4, 1996. The Manual provides safety standards common to DoD and private industry ammunition and explosives (A & E), operations and facilities. DoD 6055.9-STD, "DoD Ammunition and Explosives Safety Standards, October 1992, establishes these safety standards and serves as the

primary source document from which this unclassified Manual is derived. The DoD Supplement to the Federal Acquisition Regulation require' contracting officers to incorporate this Manual in A & E procurement actions to achieve parity between contractor and DoD component compliance. The purchasing activity may include additional A & E or related safety requirements as it deems necessary.

2013-01-20 The Defense  
Acquisition System is the  
management process that  
guides all DoD acquisition  
programs. DoD Directive  
5000.01, The Defense  
Acquisition System, provides  
the policies and principles that  
govern the defense acquisition  
system. DoD Instruction  
5000.02, Operation of the  
Defense Acquisition System, in

turn establishes the management framework that implements these policies and principles. The Defense Acquisition Management Framework provides an event-based process where acquisition programs proceed through a series of milestones associated with significant program phases. Details on the milestones and program phases are found in section 3 of this instruction. The instruction also identifies the specific statutory and regulatory reports and other information requirements for each milestone and decision point.
