Building Embedded Linux Systems Karim Yaghmour 2003-04-22 Linux® is being adopted by an increasing number of embedded systems developers, who have been won over by its sophisticated scheduling and networking, its cost-free license, its open development model, and the support offered by rich and powerful programming tools. While there is a great deal of hype surrounding the use of Linux in embedded systems, there is not a lot of practical information. Building Embedded Linux Systems is the first in-depth, hard-core guide to putting together an embedded system based on the Linux kernel. This indispensable book features arcane and previously undocumented procedures for: Building your own GNU development toolchain Using an efficient embedded development framework Selecting, configuring, building, and installing a target-specific kernel Creating a complete target root filesystem Setting up, manipulating, and using solid-state storage devices Installing and configuring a bootloader for the target Cross-compiling a slew of utilities and packages Debugging your embedded system using a plethora of tools and techniques Details are provided for various target architectures and hardware configurations, including a thorough review of Linux's support for embedded hardware. All explanations rely on the use of open source and free software packages. By presenting how to build the operating system components from pristine sources and how to find more documentation or help, this book greatly simplifies the task of keeping complete control over one's embedded operating system, whether it be for technical or sound financial reasons. Author Karim Yaghmour, a well-known designer and speaker who is responsible for the Linux Trace Toolkit, starts by discussing the strengths and weaknesses of Linux as an embedded operating system. Licensing issues are included, followed by a discussion of the basics of building embedded Linux systems. The configuration, setup, and use of over forty different open source and free software packages commonly used in embedded Linux systems are also covered. uClibc, BusyBox, U-Boot, OpenSSH, tftpd, tftp, strace, and gdb are among the packages discussed.

Surviving the Storms Helen Dmitriew 1992 *Surviving the Storms: Memory of Stalin's Tyranny* is the story of courage and tenacity. Certainly, it is an account of punishment without crime - the first-person chronicle of life under Stalin in the 1930s and the Nazi invading army in the 1940s. Declared "enemies of the people" during the Stalinist purges, the eleven-year-old Helen Dmitriew and her family were forced from their home in the Smolensk district, stripped of their belongings, and transported in closed railroad cars to Siberia, where the family was separated. Dmitriew and her sick mother eventually found their way back from the Siberian wilderness, hiding in friendly homes or railroad cars, sleeping in dangerous forests, and concealing their "social origins" when interrogated by Soviet authorities. Although life in the general vicinity of Minsk returned to "normal" and Dmitriew earned her teacher's credentials and married, it was still characterized by deprivation, malnutrition, and sickness. She was reunited with her father in Leningrad only briefly, then never to see him (or ultimately any of her family members) again. During the Nazi invasion, when the Soviet armies fled in its path, her first husband was fatally shot by drunken German soldiers during "target practice". The next month she gave birth to her only daughter, whose survival today is hardly short of a miracle. Yet Dmitriew never gave up, never stopped helping other innocent victims of Soviet barbarity and Nazi cruelty, and eventually found herself assigned to a labor farm in Bavaria, which was eventually liberated by the American army. Here she also met her second husband, the survivor of two death sentences at the hands of the Soviet government. Together this fugitive family successfully escaped the certain death of Soviet "repatriation", a program initially supported by the western allies, and managed to immigrate to Canada, where they began life again. Today Helen Dmitriew is a professor of Russian in Fresno, California, and her daughter is an insurance agent in Los Angeles. At a time when the former Soviet Union faces economic and social uncertainty, Dmitriew's life story of nerve, compassion, and survival is a living testament to Russian character and endurance.
