Leadership and Management in the Early Years

Caroline Jones

2008-03-16 Early childhood practitioners are often

reluctant to see themselves as leaders and managers.

However, all those who work with young children and their families, whatever their level of experience and competence, have to undertake both of these roles on a daily basis.

This book encourages practitioners to recognise their active involvement in leadership and management in relation to their work as team leader or team member, and in their work with parents and other professionals, to ensure appropriate and effective provision for young children. The authors identify a number of key principles involved in effective early years leadership

and management, which focus on the idea that: Leadership is about influencing others to improve and enhance children's care, learning and development Leadership is only effective if it develops the leadership of others by supporting a team or group in meeting their declared aims or vision Leadership is ultimately distributed, shared and dispersed in early childhood settings These principles are supported by a detailed exploration of the statutory demands made on practitioners working with young children and their families, and reference to relevant literature drawn from both early childhood studies and leadership theories. As well as providing guidance on the roles, responsibilities and tasks facing early childhood leaders, the book features a number of case studies and practical tasks, giving life to concepts and ideas and enabling readers to apply theories and policies to their own work settings. Additional activities at the end of each chapter further support

practitioners in fulfilling their leadership and management roles in practice. Leadership and Management in the Early Years is an essential text for early years and early childhood studies students as well as practitioners particularly those who are aiming for Early Years Professional Status.

Handbook of Classroom Management Carolyn M.

Evertson 2013-10-31

Classroom management is a topic of enduring concern for teachers, administrators, and the public. It consistently ranks as the first or second most serious educational problem in the eyes of the general public, and beginning teachers consistently rank it as their most pressing concern during their early teaching years.

Management problems continue to be a major cause of teacher burnout and job dissatisfaction. Strangely, despite this enduring concern on the part of educators and the public, few researchers have chosen to focus on classroom management or to identify themselves with this critical field. The Handbook of Classroom Management has four primary goals: 1) to clarify the term classroom management; 2) to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers' managerial tasks; 3) to bring together disparate lines of research and encourage conversations across different areas of inquiry; and 4) to promote a vigorous agenda for future research in this area. To this end, 47 chapters have been organized into 10 sections, each chapter written by a recognized expert in that area. Cutting across the sections and chapters are the following themes: *First, positive teacher-student

relationships are seen as the very core of effective classroom management. *Second, classroom management is viewed as a social and moral curriculum. *Third, external reward and punishment strategies are not seen as optimal for promoting academic and social-emotional growth and self-regulated behavior. *Fourth, to create orderly, productive environments teachers must take into account student characteristics such as age, developmental level, race, ethnicity, cultural background, socioeconomic status, and ableness. Like other research handbooks, the Handbook of Classroom Management provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, and the academic libraries serving these audiences. It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management. *Planning an Appropriate Curriculum in the Early Years*

A Survival Guide to Early Years Leadership & Management Julie S. Dent 2016-12-17 Over time many research projects have highlighted the importance of high quality childcare in the Early Years as being critical to the future development of children. The Statutory Framework for the Early Years Foundation Stage (EYFS) places an emphasis on the overall quality of provision being dependant on all practitioners having appropriate qualifications,

training and skills. It also stresses the importance of supporting individuals continued professional development to ensure practitioners can build on their knowledge and skills. Many courses and qualifications are, also, available to enable leaders to improve their practice as they play a huge part in guaranteeing the standards of delivery are high within their setting. Leaders and managers are challenged with not only the day-day running of a setting, recruiting and motivating a high quality workforce but with the ever moving goal posts of national and local government, expectations of parents and staff demands. This often results in those who are in leadership and management roles wearing "a variety of hats" during a busy working day. This book gives practical advice on how to manage, lead and inspire a team and provide strategies and useful tips relating to everyday situations based on the authors 30 years of experience in childcare. The

reader will be able to dip in and out of the various chapters which will highlight why theory is important and translate it to practical key issues. It will have a practical approach making it an easy to read tool which will inspire the reader and enable them to perfect their own skills. This book will examine the complexities of improving the quality of the setting and how to collate the evidence to reflect this. It will stand out from other Leadership & Management books as it will provide practical advice relating to everyday issues. No-one prepares you for the day a staff member finds a bag of cannabis in the Maths Area. This book will differ from others as it will provide discrete entries which will not identify individuals or individual settings based on real life events as they have unfolded. It will examine team dynamics and draw on personal thoughts and feelings demonstrating the emotional rollercoaster which managers embark upon. At times it will

be sombre and tear jerking and others humorous. It will be thought provoking and give a clear insight into the varying roles the job dictates dependant on what you may face on arrival, or what comes to your office door during the course of a busy working day. It aims to be an easy read at the end of a busy working day which will make readers laugh out load or reach for their tissues. The readers will be inspired, motivated and feel supported as the realisation dawns that they are not alone in their quest to offer outstanding experiences and inspirational settings in which children can learn and grow. It will offer periods of reflection relating to the readers own beliefs and values and that of the setting.
