Godric St. Laurent, Duke of Essex: A rake. A scoundrel. And now he's a kidnapper. Godric St. Laurent, Duke of Essex, relishes the rakish reputation society has branded him with. He has no plans to marry anytime soon—if ever. When he kidnaps an embezzler's niece for

revenge, the difficult debutante's blend of sweetness and sharp tongue both infuriate and intrigue him. Miss Emily Parr is determined to rid herself of domineering men in her life. Her plan is in shambles after she's kidnapped by the incorrigible duke. As she tries to outwit him, she finds herself... enjoying not only the scorching kisses he steals but also his companionship. Of course the most wicked and unweddable man she's ever met would be the one she can't imagine living without. As they surrender to passion, danger from Godric's past threatens to destroy the one thing he and Emily swore they never wanted: love. Warning: This novel includes a lady who refuses to stay kidnapped, a devilish duke with a dark past, and an assortment of charming rogues who have no idea what they've gotten themselves into.

Design And Development Of A Wiki-based Collaborative Process Writing Pedagogy: Putting Technological, Pedagogical, And Content Knowledge (Tpack) In Action Xuanxi Li 2022-01-05 This book provides an example of the capitalization of computer and wiki technology to support collaborative writing among Mainland Chinese upper primary school students. It presents the results of a study showing the application of the Design-Based Research (DBR) methodology to design a Wiki-based Collaborative Process Writing Pedagogy (WCPWP) to help students with their writing in the Chinese context. The WCPWP is designed and developed based on social constructivist theory and the social view of writing process

theory, as well as in consideration of the Technological, Pedagogical, and Content Knowledge (TPACK) framework. Primarily aimed at researchers and practitioners in the fields of collaborative learning, TPACK, and Chinese writing, as well as Chinese language educators, this book will also deepen primary educators' understanding of the links among technology, pedagogy and content, and guide educators in the integration of social media, as well as the design of effective matching pedagogic strategies, in their teaching of writing.

Potential Theory and Dynamics on the Berkovich Projective Line Matthew Baker 2010-03-10 The purpose of this book is to develop the foundations of potential theory and rational dynamics on the Berkovich projective line over an arbitrary complete, algebraically closed non-Archimedean field. In addition to providing a concrete and "elementary" introduction to Berkovich analytic spaces and to potential theory and rational iteration on the Berkovich line, the book contains applications to arithmetic geometry and arithmetic dynamics. A number of results in the book are new, and most have not previously appeared in book form. Three appendices--on analysis, \mathbb{R} -trees, and Berkovich's general theory of analytic spaces--are included to make the book as self-contained as possible. The authors first give a detailed description of the topological structure of the Berkovich projective line and then introduce the Hsia kernel, the fundamental kernel for potential theory. Using the theory of metrized graphs, they define a Laplacian operator on the Berkovich line and construct theories of capacities, harmonic and subharmonic functions, and Green's functions, all of which are strikingly similar to their classical complex counterparts. After developing a theory of multiplicities for rational functions, they give applications to non-Archimedean dynamics, including local and global equidistribution theorems, fixed point theorems, and Berkovich space analogues of many fundamental results from the classical Fatou-

Julia theory of rational iteration. They illustrate the theory with concrete examples and exposit Rivera-Letelier's results concerning rational dynamics over the field of p -adic complex numbers. They also establish Berkovich space versions of arithmetic results such as the Fekete-Szego theorem and Bilu's equidistribution theorem.

Persists and Desists in Crime from Adolescence into Adulthood Dr Machteld Hoeve 2013-01-28 Too many juvenile delinquents persist in their offending into adulthood. They constitute a major burden for individual victims, for businesses and the justice system, all contributing to the total cost of crime for society. Focusing on the transition between juvenile offending and adult crime, this book examines research based on Dutch, European and North-American studies on the persistence

and discontinuity of offending between late adolescence and early adulthood. Presenting empirical studies showing why persistence or discontinuity take place, the book provides up-to-date information on preventive and remedial interventions to promote discontinuity of offending amongst young adults. From the same team who produced 'Tomorrow's Criminals', this book will be a valuable resource for criminologists, criminal justice professionals, psychologists, sociologists, and psychiatrists interested in juvenile and young adult offenders, as well as those interested in what makes career criminals and youth who reform.

Public Value and Public Administration John M. Bryson 2015-08-28 Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume brings together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement, and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, Public Value and Public Administration is an essential blueprint for those interested in creating public value to advance the common good.
