Liberty Bell 7 Colin Burgess 2014-03-19
 NASA's Mercury astronauts were seven highly skilled professional test pilots. Each of them seemed to possess the strength of character and commitment necessary to overcome apparently insurmountable obstacles as the United States entered into a Cold War space race with the Soviet Union. This was never more evident than on the epic suborbital MR-4 flight of Liberty Bell 7 with astronaut Virgil ('Gus') Grissom piloting the spacecraft to a successful splashdown, followed by the premature blowing of the craft's explosive hatch. After a hurried exit and struggling to stay afloat, he could only watch helplessly as the recovery helicopter pilot valiantly fought a losing battle to save the sinking capsule. That day NASA not only lost a spacecraft but came perilously close to losing

one of its Mercury astronauts, a decorated Korean fighter pilot from Indiana who might one day have soared to the highest goal of them all, as the first person to set foot on the Moon. For the first time, many of those closest to the flight of Liberty Bell 7 and astronaut Gus Grissom offer their stories and opinions on the dramatic events of July 21, 1961, and his later pioneering Gemini mission. They also tell of an often controversial life cut tragically and horrifically short in a launch pad fire that shocked the nation.

 The real Top Gun - the dramatic account of the US Navy's fighter pilots and how they took back the skies over Vietnam In the darkest days of the Vietnam War, the US Navy's kill ratio had fallen to 2:1 - a deadly decline in pilot combat effectiveness. To improve the odds, a corps of hardened fighter pilots founded the Fighter

Weapons School, a.k.a. Top Gun. Utilising actual enemy fighter planes in brutally realistic dogfights, the Top Gun instructors dueled with their students and each other to achieve a lethal new level of fighting expertise. The training paid off and the Top Gunners dominated the skies over Vietnam. This gripping account takes you inside the cockpit for an adventure more explosive than any fiction, in the dramatic true story of the legendary military school that has created the most dangerous fighter pilots the world had ever seen.

From Borneo to Lockerbie Geoffrey Leeming 2013-06-19 Geoff Leeming belongs to an elite group of helicopter pilots. He describes his flying experiences in under-powered, and by today's high-tech standards, basic choppers such as the single-engine Whirlwinds and its successor, the Wessex, whether in turbulent tropical conditions, windswept mountains or low level over raging seas. Much of Geoff's flying career was in Search and Rescue (SAR) calling for the highest flying skills and the coolest of nerves. It fell to the pilot to make life-and-death decisions for both their crews and those they were rescuing. In addition to many great SAR accounts, this book begins with accounts of action in Borneo in the 1960s and ends with Geoff's fascinating account of his flying involvement in the aftermath of the Pan Am Lockerbie disaster. The result is a medley of
