Bu21 (New Edition) Stuart Slade 2017-01-05 Stuart Slade's play comprises six interlinking monologues. It premiered at Theatre503, London, in 2016, in a co-production with Kuleshov, before transferring to the Trafalgar Studios, London, in January 2017. "So you know how on the news these days there's just this endless stream of horrendous shit going down, like every single night? Suicide bombs, mass shootings, genocides, drone strikes, school massacres - it's like the end of the world or something... And you're kind of like - 'Could I even cope if that stuff happened to me?'" Six young people are caught in the aftermath of a terrorist attack in the heart of London. By turns terrifying, inspiring, brutal, heartbreaking and hilarious, BU21 is verbatim theatre from the very near future.

Manual of Urologic Surgery

A. T. K. Cockett 2012-12-06

The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major

operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.
