Warm Beer, Lousy Food John S. Columbia 2009-12 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

[The Idea of Man](#) Ming Thein 2014-12-29 For as long as man has consciously existed - really lived - we have questioned the nature and purpose of our own existence; why are we here? What does it mean to be human? This is a photographic interpretation of the complexity and the idea of man abstracted from the individual, in the form of a series of candid observations. It's a documentary, street photography journal and a philosophical work with a twist.

[Forestry Applications of Unmanned Aerial Vehicles \(UAVs\) 2019](#) Alessandro Matese 2020-11-23 Unmanned aerial vehicles (UAVs) are new platforms that have been increasingly used in the last few years for forestry applications that benefit from the added value of flexibility, low cost, reliability, autonomy, and capability of timely provision of high-resolution data. The main adopted image-based technologies are RGB, multispectral, and thermal infrared. LiDAR sensors are becoming commonly used to improve the estimation of relevant plant traits. In comparison with other permanent ecosystems, forests are particularly affected by climatic changes due to the longevity of the trees, and the primary objective is the conservation and protection of forests. Nevertheless, forestry and agriculture involve the cultivation of renewable raw materials, with the difference that forestry is less tied to economic aspects and this is reflected by the delay in using new monitoring technologies. The main forestry applications are aimed toward inventory of resources, map diseases, species classification, fire monitoring, and spatial gap estimation. This Special Issue focuses on new technologies (UAV and sensors) and innovative data elaboration methodologies (object recognition and machine vision) for applications in forestry.

Natural Disturbances and Historic Range of Variation Cathryn H. Greenberg 2015-10-26 This book discusses the historic range of variation (HRV) in the types, frequencies, severities and scales of natural disturbances, and explores how they create heterogeneous structure within upland hardwood forests of the Central Hardwood Region (CHR). The book was written in response to a 2012 forest planning rule which requires that national forests to be managed to sustain 'ecological integrity' and within the 'natural range of variation' of natural disturbances and vegetation structure. Synthesizing information on HRV of natural disturbance types, and their impacts on forest structure, has been identified as a top need.

Photogrammetric Applications for Cultural Heritage JON. BEDFORD 2017-10-31 This guidance covers the practical application of photogrammetry in recording cultural heritage, with particular reference to structure from motion (SfM) techniques. Our audience for this

document includes survey contractors, archaeological contractors, voluntary organisations and specialists. Photogrammetric image acquisition and processing, until recently requiring a considerable investment in hardware and software, are now possible at a fraction of their former cost. This has led to a huge increase in the use of photogrammetry in cultural heritage recording. The skills required to apply the techniques successfully and accurately are discussed, and background information on how various parts of the process work is provided so that better results can be achieved through better understanding. Photogrammetry is characterised by its versatility, and is applicable over a wide range of scales, from landscapes to small objects. The particular requirements needed at these different scales are outlined, and both imaging techniques and useful ancillary equipment are described. The different types of outputs are discussed, including their suitability for further interrogation using a range of established analytical techniques and the presentation options available. A range of case studies illustrates the application of photogrammetry across a variety of projects that broadly reflect the areas discussed in the text. This document is one of a number of Historic England technical advice documents on how to survey historic places.

The Political and Economic Thought of the Young Keynes Carlo Cristiano 2014-06-13 A century ago, John Maynard Keynes entered the Treasury to serve his country during the First World War, but as is well known, appalled by the terms of the end-of-war Treaty of Versailles, he abandoned the British delegation, outlining the predictable adverse results in the *Economic Consequences of the Peace*, published in 1919. Far less well known is his personal and political development that led him to be called to service even before Great Britain entered the conflict. Starting from Keynes's early political activity, Carlo Cristiano charts the stages through which Alfred Marshall's young pupil rapidly rose to be one of his country's major experts on monetary issues. The very young Liberal Imperialist was soon to become a staunch supporter of the liberal government, strongly committed to Lloyd George's 1909 'people's budget'. Moreover, the good relations he had established during his two years at the India Office of London and his growing expertise in money and finance, made him one of the few who genuinely grasped the functioning of the pre-war gold standard, and an ally of the Treasury and the Bank of England in the struggle within the City for control and management of London's gold reserves. Abandoning the stereotyped image of Keynes in his early years, so often described as a young connoisseur interested in philosophy and with little inclination for politics, this book sees his perfect fusion of political vision and economic competence in the era of 'New Liberalism' as the true wellspring of Keynesianism.
