Hacks are arranged by topic for quick and easy lookup, and each one stands on its own so you can jump around and tweak whatever system or gadget strikes your fancy. Pick up this book and take control of Mac OS X and your favorite Apple gadget today!

Never Too Small Joe Beath 2023-04-19 Joel Beath and Elizabeth Price explore this question drawing inspiration from a diverse collection of apartment designs, all smaller than 50m²/540ft². Through the lens of five small-footprint design principles and drawing on architectural images and detailed floor plans, the authors examine how architects and designers are reimagining small space living. Full of inspiration we can each apply to our own spaces, this is a book that offers hope and inspiration for a future of our cities and their citizens in which sustainability and style, comfort and affordability can co-exist. *Never Too Small* proves living better doesn't have to mean living larger.

The Natural Cozy Cottage Christiane Bellstedt Myers 2022-03-08 Create a haven of coziness and calm that embraces you as you walk through the door with Chris Myers' effortless styling ideas and tips. Taking a room-by-room approach, Chris describes the essentials of creating coziness from the colors to use, the textiles to incorporate, the decorative accessories and lighting to include, and how to bring a sense of personality and uniqueness to your own space. Using natural, or pre-loved and re-purposed objects is an important element of this ethos. Wherever you live, in an urban apartment, town house, or country cottage, Chris will inspire you to bring comfort and happiness into your space whether by creating a welcoming wreath for the front door made from foraged items, kitchen curtains made from old vintage tea towels, eco-friendly natural cleaning products, or lavender bags and scented candles... Your home will become a sanctuary, a home for the soul surrounded by the things you love, a place you will long to return to at the end of the day and one that is kind to the planet too.

Rust for Rustaceans Jon Gjengset 2021-12-21 Master professional-level coding in Rust. For developers who've mastered the basics, this book is the next step on your way to professional-level programming in Rust. It covers everything you need to build and maintain larger code bases, write powerful and flexible applications and libraries, and confidently expand the scope and complexity of your projects. Author Jon Gjengset takes you deep into the Rust programming language, dissecting core topics like ownership, traits, concurrency, and unsafe code. You'll

explore key concepts like type layout and trait coherence, delve into the inner workings of concurrent programming and asynchrony with `async/await`, and take a tour of the world of `no_std` programming. *Gjengset* also provides expert guidance on API design, testing strategies, and error handling, and will help develop your understanding of foreign function interfaces, object safety, procedural macros, and much more. You'll Learn: • How to design reliable, idiomatic, and ergonomic Rust programs based on best principles • Effective use of declarative and procedural macros, and the difference between them • How asynchrony works in Rust - all the way from the `Pin` and `Waker` types used in manual implementations of `Futures`, to how `async/await` saves you from thinking about most of those words • What it means for code to be unsafe, and best practices for writing and interacting with unsafe functions and traits • How to organize and configure more complex Rust projects so that they integrate nicely with the rest of the ecosystem • How to write Rust code that can interoperate with non-Rust libraries and systems, or run in constrained and embedded environments *Brimming with practical, pragmatic insights that you can immediately apply*, *Rust for Rustaceans* helps you do more with Rust, while also teaching you its underlying mechanisms.

Nature Inside Penny Sparke 2021-02-02 The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary "living walls" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, Nature Inside explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant.

Programming Rust Jim Blandy 2021-06-11 Systems programming provides the foundation for the world's computation. Writing performance-sensitive code requires a programming language that puts programmers in control of how memory, processor time, and other system resources are used. The Rust systems programming language combines that control with a modern type system that catches broad classes of common mistakes, from memory management errors to data races between threads. With this practical guide, experienced systems programmers will learn how to successfully bridge the gap between performance and safety using Rust. Jim Blandy, Jason Orendorff, and Leonora Tindall demonstrate how Rust's features put programmers in control over memory consumption and processor use by combining predictable performance with memory safety and trustworthy concurrency. You'll learn: Rust's fundamental data types and the core concepts of ownership and borrowing How to write flexible, efficient code with traits and generics How to write fast, multithreaded code without data races Rust's key power tools: closures, iterators, and asynchronous programming Collections, strings and text, input and output, macros, unsafe code, and foreign function interfaces This revised, updated edition covers the Rust 2021 Edition.

Outside Gill Meller 2022-05-04 Gill Meller's new book *Outside* is a thoughtful celebration of the joys of cooking and eating outdoors. We shouldn't be shutting doors any more - we should be opening them... From his rural home overlooking the sea, Gill is perfectly placed to write about open-air cooking, whether it's a simple campfire on the beach or a barbecue in the garden, evoking pictures of summery platters on laden tables, and slow, gentle picnics in fields. With more people than ever staying at home for their holidays, taking the family camping or walking, as well as meeting friends for picnics and barbecues, it feels like people have rediscovered their love of the outdoors. Gill's cooking is, as always, inspired by the changing seasons and encourages us to

reconnect with nature and the world around us through the food we eat. So whether you want a bowl of something hearty and warming on a wintry walk, or crave something bright, fresh and zesty to enjoy by the coast in the sunshine, there are recipes to delight everyone, wherever they are.

The Company I Keep Leonard A. Lauder 2020-11-17 In his much-anticipated memoir, *The Company I Keep: My Life in Beauty*, Chairman Emeritus and former CEO of The Estée Lauder Companies Leonard A. Lauder shares the business and life lessons he learned as well as the adventures he had while helping transform the mom-and-pop business his mother founded in 1946 in the family kitchen into the beloved brand and ultimately into the iconic global prestige beauty company it is today. In its infancy in the 1940s and 50s, the company comprised a handful of products, sold under a single brand in just a few prestigious department stores across the United States. Today, The Estée Lauder Companies constitutes one of the world's leading manufacturers and marketers of prestige skin care, makeup, fragrance and hair care products. It comprises more than 25 brands, whose products are sold in over 150 countries and territories. This growth and success was led by Leonard A. Lauder, Estée Lauder's oldest son, who envisioned and effected this expansion during a remarkable 60-year tenure, including leading the company as CEO and Chairman. In this captivating personal account complete with great stories as only he can tell them, Mr. Lauder, now known as The Estée Lauder Companies' "Chief Teaching Officer," reflects on his childhood, growing up during the Great Depression, the vibrant decades of the post-World War II boom, and his work growing the company into the beauty powerhouse it is today. Mr. Lauder pays loving tribute to his mother Estée Lauder, its eponymous founder, and to the employees of the company, both past and present, while sharing inside stories about the company, including tales of cutthroat rivalry with Charles Revson of Revlon and others. The book offers keen insights on honing ambition, leveraging success, learning from mistakes, and growing an international company in an age of economic turbulence, uncertainty, and fierce competition.

Earth Observation Data Cubes Gregory Giuliani 2020-03-16 Satellite Earth observation (EO) data have already exceeded the petabyte scale and are increasingly freely and openly available from different data providers. This poses a number of issues in terms of volume (e.g., data volumes have increased 10× in the last 5 years); velocity (e.g., Sentinel-2 is capturing a new image of any given place every 5 days); and variety (e.g., different types of sensors, spatial/spectral resolutions). Traditional approaches to the acquisition, management, distribution, and analysis of EO data have limitations (e.g., data size, heterogeneity, and complexity) that impede their true information potential to be realized. Addressing these big data challenges requires a change of paradigm and a move away from local processing and data distribution methods to lower the barriers caused by data size and related complications in data management. To tackle these issues, EO data cubes (EODC) are a new paradigm revolutionizing the way users can store, organize, manage, and analyze EO data. This Special Issue is consequently aiming to cover the most recent advances in EODC developments and implementations to broaden the use of EO data to larger communities of users, support decision-makers with timely and actionable information converted into meaningful geophysical variables, and ultimately unlock the information power of EO data.

A Foodie Afloat Di Murrell 2020-07-28 A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to

an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A Foodie Afloat is the 2020 UK winner of the World Gourmand Cookbook Awards in the Food Tourism category.

The Garden House Marcia Willett 2020-04-16 'A warm and engaging read' Trisha Ashley 'Lovely... Made me long for a long hot summer by the sea' Jo Thomas A sweeping story about family and buried secrets set in Devon, perfect for fans of Erica James and Veronica Henry. After the death of her father, El moves into his home just outside Tavistock in Devon. Fresh out of university and dangling on the precipice of adulthood she questions what it is she really wants from life. Although her childhood friend, Will, is there to help her through her grief she soon realises there were things her father was hiding from her... Jules is also mourning Martin, but they thought best to keep their relationship secret, she must now grieve entirely alone. All she has to remember her love are the memories of their time spent at a beautiful community garden and teashop nearby. The Garden House is where they met, fell in love and where their secret affair will inevitably be uncovered. As El and Will begin to piece together her father's secrets they are brought closer and closer to both Jules and a truth that is difficult to face. ***** Praise for Marcia Willett: 'A beautifully woven tale of families and their secrets...' Liz Fenwick 'Riveting, moving and utterly feel-good' Daily Mail 'Sweeping powers of description transport her readers to another time and place' Rosanna Ley ***** Readers are loving The Garden House: 'Oh Marcia, yet another wonderful book!' 'I have read all the books Marcia has written. She never disappoints' 'Like putting on a favourite old sweater or comfy pair of slippers... I try to ration when I read so I don't finish it all in one go'
