2018-04-13 Are accountability and ownership for Data acquisition clearly defined? Is Data acquisition currently on schedule according to the plan? Is there a Data acquisition management charter, including business case, problem and goal statements, scope, milestones, roles and responsibilities, communication plan? How will we insure seamless interoperability of Data acquisition moving forward? Who will be responsible for documenting the Data acquisition requirements in detail? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Data acquisition investments work better. This Data acquisition All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth Data acquisition Self-Assessment. Featuring 702 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Data acquisition improvements can be made. In using the questions you will be better able to: - diagnose Data acquisition projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Data acquisition and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Data acquisition Scorecard, you will develop a clear picture of which Data acquisition areas need attention.
