Building Your Own Computer. No Frills, No Filler, Just Answers David Majlak 2011-05-04

3D Laser Scanning for Heritage Clive Boardman 2018 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Pragmemes and Theories of Language Use Keith Allan 2017-01-10 This volume offers recent developments in pragmatics and adjacent territories of investigation, including important new concepts such as the pragmatic act and the pragmeme, and combines developments in neighboring disciplines in an integrative holistic pragmatic approach. The young science of pragmatics has, from its inception, differentiated itself from neighboring fields in the humanities, especially the disciplines dealing with language and those focusing on the social and anthropological aspects of human behavior, by focusing on the language user in his or her societal environment.This collection of papers continues that emphasis on language use, and pragmatic acts in their context. The editors and contributors share a perspective that essentially considers language as a system for communication and wants to look at language from a societal perspective, and accept the view that acts of interpretation are essentially embedded in culture. In an interdisciplinary approach, some authors explore connections with social theory, in particular sociology or socio-linguistics, some offer a political stance (critical discourse analysis), others explore connections with philosophy and philosophy of language, and several papers address problems in theoretical pragmatics.
