Beekeeping Study Notes: Bbka Certificate in Beekeeping Husbandary J. D. Yates

2019-02-13 This book, the violet book, brings the series of Beekeeping Study Notes for the British Beekeeper's Association examinations up to date . The series includes the brown book for the Basic, the green and orange volumes for the modules leading to the Intermediate and Advanced Certificates, the red book for the Practical Examination and the blue book for the Microscopy module. These notes address the 85 topics included in the BBKA syllabus for this examination; an oral and practical assessment held in the Candidate 's apiary. The notes cover all reasonable answers to questions likely to be asked when the Candidate is face to face with the examiner. There are topics in the syllabus new to the BBKA series of examinations, such as public health and safety as overseen by the Environmental Heath Officer in the Candidate 's area; these are not covered in other books for this examination . The book is up to date with present practice and also up to date with disease terminology that is, unfortunately, continually changing. The Authors, Dawn and John Yates, need no introduction, they have many year 's experience as Master Beekeepers; they are eminently qualified to prepare these notes for future candidates.

Top-Bar Beekeeping Les Crowder 2012-11-27 In recent years beekeepers have had to face tremendous challenges, from pests such as

varroa and tracheal mites and from the mysterious but even more devastating phenomenon known as Colony Collapse Disorder (CCD). Yet in backyards and on rooftops all over the world, bees are being raised successfully, even without antibiotics, miticides, or other chemical inputs. More and more organically minded beekeepers are now using top-bar hives, in which the shape of the interior resembles a hollow log. Long lasting and completely biodegradable, a topbar hive made of untreated wood allows bees to build comb naturally rather than simply filling prefabricated foundation frames in a typical box hive with added supers. Top-bar hives yield slightly less honey but produce more beeswax than a typical Langstroth box hive. Regular hive inspection and the removal of old combs helps to keep bees healthier and naturally disease-free. Top-Bar Beekeeping provides complete information on hive management and other aspects of using these innovative hives. All home and hobbyist beekeepers who have the time and interest in keeping bees intensively should consider the natural, low-stress methods outlined in this book. It will also appeal to home orchardists, gardeners, and permaculture practitioners who look to bees for pollination as well as honey or beeswax.

The BBKA Guide to Beekeeping, Second Edition Ivor Davis 2016-01-07

The number of people interested and active in keeping bees at an amateur level has continued to increase over the past few years in both rural and urban situations. This guide, aimed at beginning beekeepers, and the only one to be endorsed by

the BBKA provides an authoritative text, along with clear photographs and illustrations. The book introduces the reader to beekeeping, including such areas as the workings of the colony, the structure of a hive, how to acquire bees and keep them healthy and what happens in each month in a beekeeping year. Each chapter is accompanied by anecdotes, answers to frequently asked questions and fascinating facts about bees and honey. The new edition includes new step-by-step sequences to illustrate procedures such as containing a swarm, identifying the queen, using a smoker and cleaning a hive as well as more information on different kinds of hives, disease management and many other key areas.

Beekeeping Study Notes for the Basic and Intermediate Examinations of the Fibka B. D. Yates 2015-02-13 This book addresses each topic in the FIBKA Basic and Intermediate Examinations with a view to assisting those studying on their own informally at home. The syllabus is a long one with over 90 topics to be considered. Until the issue of this book it was necessary for the student to consult a multitude of different works to acquire a thorough understanding of the subject matter for examination purposes. The book is a must for anyone contemplating either of the two examinations. The authors are very well qualified to prepare such a volume. They are both BBKA examiners and Master Beekeepers and are well familiar with the problems that confront students and candidates. They are both past winners of the coveted Wax Chandler Prize for the best results in the BBKA Senior Examinations and are the only man and wife team to achieve this feat. John started beekeeping during the second world war and Dawn started after they returned to the UK from careers in the Colonial Service, Engineering and Nursing respectively. They are now retired in Devon and manage 20 colonies and about the same number of nuclei as part of their queen rearing programme each year. John has been a member for some years of the BBKA Examination Board.

Construction Information for Dartington

Hives Robin Dartington 2018-01-12 Robin Dartington made his first Long Deep hives around 1975, to reduce the problems when keeping bees on the roof of a five-storey house. Very simply, the Long Deep hive is a Deep National with a back extension, so avoiding the need for an extra hive when making an artificial swarm. New Beekeeping has now been developed into a comprehensive system for keeping bees for recreation, in safety and with maximum enjoyment. The system minimises labour - and more than halves the heaviest lifting involved in using a conventional National hive! Bees can be kept in a wide range of gardens - but operating the hive must be safe both for the beekeeper and neighbours. There must be a reliable management approach to avoid the issue of swarms. Hives should also look good and add to the attractiveness of the garden. Junk such as odd stands, piles of old supers and even rarely used nucleus hives should be avoided. A Dartington Long Deep hive includes all the space and features that are needed to manage a colony throughout the whole of the season, without additional boxes. The management system for the Dartington Long Deep Hive is fully described in the Manual of New Beekeeping - a 100-page booklet containing many colour illustrations. A new edition is being prepared to update the information. Construction Information provides full details for making the Dartington Long Deep Hive for your own use. The design is copyrighted to protect its integrity. Written permission must be obtained from the author before any of the information is used for the purposes of trade.

Beekeeping Study Notes J. D. Yates 2017-06-07 This book follows the same style and approach as all the other popular Beekeeping Study Notes for the BBKA Examinations, the first of which was published in 1990. This third edition has been updated and prepared by John and Dawn Yates. They need no introduction as they are both well known beekeepers. They have followed their usual style by addressing every section of the syllabus in considerable detail in order to assist those who may be contemplating sitting this examination. They are both Master Beekeepers having passed the BBKA Senior Examination on successive years and both

gaining the coveted Wax Chandler Prize for the best written papers of their year. They are both convinced that the BBKA must be a self-supporting organisation, particularly in the educational field where the traditional assistance from County Bee Instructors has now vanished and assistance from the National Bee Unit in adult bee disease diagnosis has become prohibitively expensive for the average beekeeper. These latest study notes will be especially useful for the training of branch microscopists. The book provides the necessary information to enable those who are interested in microscopy to attain the confidence and competence required. The examination syllabus has changed since the first edition was prepared; it now contains much on safety and hygiene. This third edition has several new colour plates. Protecting Pollinators Jodi Helmer 2019-04-18

We should thank a pollinator at every meal.

These diminutive creatures fertilize a third of the crops we eat. Yet half of the 200,000 species of pollinators are threatened. Birds, bats, insects, and many other pollinators are disappearing, putting our entire food supply in jeopardy. *Protecting Pollinators* breaks down the latest science on environmental threats and takes readers inside the most promising conservation efforts. Efforts range from cities creating butterfly highways to citizen scientists monitoring migration. Along with inspiring stories of revival and lessons from failed projects, readers will find practical tips to get involved. And they will be reminded of the magic of pollinators--the iconic monarchs, dainty hummingbirds, and homely bats alike who bring food to our tables.

The Tears of Re Gene Kritsky 2015 According to Egyptian mythology, when the god Re cried, his tears turned into bees upon touching the ground. Beyond the realm of myth, the honey bee is a surprisingly common and significant motif in Egyptian history, playing a role in the mythology, medicine, art, and food of the ancient culture. In this book, entomologist Gene Kritsky presents the first full-length discussion of the ways in which bees were a part of life in ancient Egypt, shedding light on one of the many mysteries of the ancient world. Kritsky delves into ancient Egypt's complex society, revealing that bees had a significant presence in

everything from death rituals to trade. In fact, beekeeping was a state-controlled industry, and in certain instances honey could even be used to pay taxes! Honey was used both to sweeten foods and treat cuts, and was sometimes used as a tribute or offering. From the presence of bees in paintings and hieroglyphs in tombs to the use of beeswax in a variety of products, bees had a significant presence in ancient Egyptian culture.

Buzz Thor Hanson 2018-07-02 BBC RADIO 4

BOOK OF THE WEEK 'Popular science at its most accessible: fun, fascinating and full of engaging pen portraits of the scientists and bee enthusiasts he meets in the course of his research' Melissa Harrison, Guardian 'A smooth and accessible account of the insects that provide a significant amount of what we eat, introducing their fascinating diversity of behaviour. A reminder of why bees are wonders that we must protect.' Matt Shardlow, BBC Wildlife Bees are like oxygen: ubiquitous, essential, and, for the most part, unseen. While we might overlook them, they lie at the heart of relationships that bind the human and natural worlds. In *Buzz*, the award-winning author of *Feathers* and *The Triumph of Seeds* takes us on a journey that begins 125 million years ago, when a wasp first dared to feed pollen to its young. From honeybees and bumbles to lesser-known diggers, miners, leafcutters, and masons, bees have long been central to our harvests, our mythologies, and our very existence. They've given us sweetness and light, the beauty of flowers, and as much as a third of the foodstuffs we eat. And, alarmingly, they are at risk of disappearing. As informative and enchanting as the waggle dance of a honeybee, *Buzz* shows us why all bees are wonders to celebrate and protect. Read this book and you'll never overlook them again.

The Beekeeper's Lament Hannah Nordhaus

2011-05-24 "You'll never think of bees, their keepers, or the fruits (and nuts) of their labor the same way again." —Trevor Corson, author of *The Secret Life of Lobsters* Award-winning journalist Hannah Nordhaus tells the remarkable story of John Miller, one of

America's foremost migratory beekeepers, and the myriad and mysterious epidemics threatening American honeybee populations. In luminous, razor-sharp prose, Nordhaus explores the vital role that honeybees play in American agribusiness, the maintenance of our food chain, and the very future of the nation. With an intimate focus and incisive reporting, in a book perfect for fans of Eric Schlosser's *Fast Food Nation*, Michael Pollan's *The Botany of Desire*, and John McPhee's *Oranges*, Nordhaus's stunning exposé illuminates one of the most critical issues facing the world today, offering insight, information, and, ultimately, hope.

The Lives of Bees Thomas D. Seeley 2019-05-28 Seeley, a world authority on honey bees, sheds light on why wild honey bees are still thriving while those living in managed colonies are in crisis. Drawing on the latest science as well as insights from his own pioneering fieldwork, he describes in extraordinary detail how honey bees live in nature and shows how this differs significantly from their lives under the management of beekeepers. Seeley presents an entirely new approach to beekeeping--Darwinian Beekeeping--which enables honey bees to use the toolkit of survival skills their species has acquired over the past thirty million years, and to evolve solutions to the new challenges they face today. He shows beekeepers how to use the principles of natural selection to guide their practices, and he offers a new vision of how beekeeping can better align with the natural habits of honey bees.

The Beekeeper of Aleppo Christy Lefteri

2020-06-23 This unforgettable novel puts human faces on the Syrian war with the immigrant story of a beekeeper, his wife, and the triumph of spirit when the world becomes unrecognizable. "A beautifully crafted novel of international significance that has the capacity to have us open our eyes and see."—Heather Morris, author of *The Tattooist of Auschwitz* WINNER OF THE ASPEN WORDS LITERARY PRIZE • FINALIST FOR THE DAYTON LITERARY PEACE PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE Nuri is a beekeeper and Afra, his wife, is an artist. Mornings, Nuri rises early to hear the call to prayer before driving to his hives in the countryside. On weekends, Afra sells her colorful landscape paintings at the

open-air market. They live a simple life, rich in family and friends, in the hills of the beautiful Syrian city of Aleppo—until the unthinkable happens. When all they love is destroyed by war, Nuri knows they have no choice except to leave their home. But escaping Syria will be no easy task: Afra has lost her sight, leaving Nuri to navigate her grief as well as a perilous journey through Turkey and Greece toward an uncertain future in Britain. Nuri is sustained only by the knowledge that waiting for them is his cousin Mustafa, who has started an apiary in Yorkshire and is teaching fellow refugees beekeeping. As Nuri and Afra travel through a broken world, they must confront not only the pain of their own unspeakable loss but dangers that would overwhelm even the bravest souls. Above all, they must make the difficult journey back to each other, a path once so familiar yet rendered foreign by the heartache of displacement. Moving, intimate, and beautifully written, *The Beekeeper of Aleppo* is a book for our times: a novel that at once reminds us that the most peaceful and ordinary lives can be utterly upended in unimaginable ways and brings a journey in faraway lands close to home, never to be forgotten. Praise for *The Beekeeper of Aleppo* “This book dips below the deafening headlines, and tells a true story with subtlety and power.”—Esther Freud, author of *Mr. Mac and Me* “This compelling tale had me gripped with its compassion, its sensual style, and its onward and lively urge for resolution.”—Daljit Nagra, author of *British Museum* “This novel speaks to so much that is happening in the world today. It’s intelligent, thoughtful, and relevant, but very importantly it is accessible. I’m recommending this book to everyone I care about.”—Benjamin Zephaniah, author of *Refugee Boy*

Fifteen years old, gawky, egotistical, and recently orphaned, the young Mary Russell displays an intellect to impress even Sherlock Holmes—and match him wit for wit. Under his reluctant tutelage, this very modern twentieth-century woman proves a deft protégée and a fitting partner for the Victorian detective. But even in their first case together, the pair face a truly cunning adversary who will stop at nothing to put an end to their partnership.
