**U.S. Navy Program Guide - 2017** Department Of the Navy 2019-03-12 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

*A-6 Intruder Units of the Vietnam War* Rick Morgan 2012-12-18 Designed in the years following the Korean war and then manufactured for over 30 years starting in 1960, the A-6 quickly became the most capable attack aircraft in the US Navy's stable. The first squadron, VA-75, made its initial deployment directly into combat in south-east Asia in 1965, and, over the next eight years, ten US Navy and four Marine Intruder squadrons would conduct combat operations throughout Vietnam, Laos and Cambodia. After initial problems and a high loss rate, the type proved itself beyond all doubt as the Naval services' best night and foul-weather platform, particularly during the region's notorious monsoon season, which could ground almost all other in-theatre aircraft due to heavy rains and low visibility. The A-6 Intruder became a true classic of naval aviation over the skies of North Vietnam, with 14 of its crews being honoured with the second highest decoration in Naval service, the Navy Cross. The cost was high as 69 Intruders were lost in combat to all causes during the war. This work tells the complete story of these aircraft in combat during the Vietnam War.

**Conducting Post-World War II National Security Research in Executive Branch Records** James E. David 2001-09-30 A staggering number of post-World War II White House and agency records pertaining to national security are stored in repositories nationwide, but researchers often find it impossible to locate and access these records. This book provides considerable detail on the quantity, nature, and public accessibility of the records at the National Archives, Federal records centers, the agencies themselves, presidential libraries, and smaller repositories. The author also discusses the critical importance of federal records management policies, classification and declassification policies, and the need for improved compliance with these policies. The public has never had a comprehensive guide to assist in identifying, locating, and gaining access to agency and White House national security records. The author tells the reader where national security-related records are located, which ones are accessible to the public, and which ones are not. He also discusses the vital role of federal records management policies in determining the ultimate disposition of records and where the records are stored. In addition, he sets forth the policies governing the classification and declassification of records and the reasons the vast majority of records are still inaccessible to the public. Both beginning and experienced researchers will find this work to be of great assistance.

*Warplanes of the Fleet* David Donald 2005-03-10 Fielding one of the world's largest and most potent air forces, the US Navy operates a plethora of warplanes from the decks of its carriers - from state-of-the-art fighters, electronic jammers and surveillance platforms to training, tanking, rescue and on-board delivery assets. *Warplanes of the Fleet* examines the Navy's 10 carrier-based aircraft (including helicopters) in extraordinary detail, describing their development, avionics, weapon systems, missions and unit operators. This important reference work is packed with information, and superbly illustrated throughout with hundreds of color photos and detailed artwork. The aircraft profiled include: F/A-18C/D Hornet; F/A-18E/F Super Hornet; F-14 Tomcat; Ea-6B Prowler; E-2 Hawkeye; S-3 Viking; C-2 Greyhound; T-45 Goshawk; HH/MH/SH-60 Seahawk; and MH-53 Sea Dragon.

**Fighter** Cynthia R. Cook 2002 The Department of Defense asked RAND to examine alternatives for the final assembly and checkout (FACO) process of the Joint Strike Fighter (JSF). The authors considered alternatives to Lockheed Martin's current plan of carrying out all JSF FACO work at its Fort Worth, Texas, plant. RAND looked at single- and multiple-site options for performing FACO at four plants across the country. The authors found that no efficiency, effectiveness, or cost reasons exist to move FACO operations, or to split them between two sites or across multiple sites.

**Finding the Right Balance** John Frederic Schank 2002 Can the U.S. Navy save money by increasing its use of simulators without sacrificing readiness? The authors look at the use of simulators in the Air Force, the Marines, and French and British forces to see if the Navy's current mix of simulator and live training should be changed substantially for the first time since the 1970s. After presenting the data for each service branch and type of simulator, the authors conclude that the Navy must first decide how it wants to measure readiness before an increased use of simulators will yield tangible returns in the form of increased proficiency at lower cost.
