Life Inside the Dead Man's Curve Kevin McDonald 2016-01-29 This project was unbelievably good! It was suspenseful, supremely well written, kept me turning the pages till the very end. I can't say enough good things about it!!!” Christy Phillippe Dog Ear Publishing Editor “Kevin’s work is a warm compassionate story of helicopters in rescue missions. I only wish my father could have read it, as it brought father’s passion for the helicopter as an instrument for saving lives into reality. The author spent 35 years and logged more than 11,000 hours of flight time as a naval aviator and public-safety helicopter pilot. Kevin’s is an admirable story of a life well lived.” Igor Sikorsky, Jr. aviation historian and son of the man who invented the modern helicopter

*Flying the Bell 206 JetRanger* John Toal 2012-12-01 This book is not a substitution for the helicopter flight manual and should not be treated as such. It is intended to give further

information relating to the different sections of the flight manual and to explain the helicopter systems more clearly. I have added in some extra information where I felt it would be beneficial but overall I have tried to keep the book as simple as possible while still covering all the sections in the flight manual. This book will not teach you how to fly the aircraft. However it will give you the necessary technical information to conduct your flight safely. It is written with the new Jet Ranger pilot in mind. It is assumed that you already hold your private pilot's licence and have limited or no previous Jet Ranger experience. You should be familiar with flying techniques, as this book will not teach you how to fly.
