Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes

geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. 2012-03-30 It's no wonder descriptions of riding often resemble the words of Asian mystics and Jedi knights: The ride causes your senses to open completely. You experience only the present, the now.

Readers who prefer revving a Harley to meditating in a Zen garden know that biking is just as contemplative as chanting in the lotus position. Here, philosopher-bikers explore this seeming dichotomy, expounding on intriguing questions such as: Why are the motorcycles the real stars of Easy Rider? What would Marx and Foucault say about Harley riders' tight leather garb?

What's it like to live a dual life as a philosophy professor who wrenches his own 1965 Electra Glide? Would Jesus hang out in a biker bar or a coffeehouse? And more importantly, would He ride a Harley or a Honda? These witty, provocative essays give readers and riders a new appreciation of what it means to become one with the road.

Nuclear Energy and Nuclear Weapon Proliferation Stockholm International Peace

Research Institute 2020-11-19
In mid-1980 a second conference for the review of the Non-Proliferation Treaty (NPT) would take place in Geneva. Given the importance of preventing, or at least slowing down, nuclear weapon proliferation, this conference would be a crucial event in the field of arms control and disarmament. For many countries the technical and economic barriers to proliferation had disappeared, and the only remaining barriers were political. In an attempt to contribute to the discussions at the NPT Review Conference, SIPRI assembled a group of experts from a number of countries to discuss the technical aspects of the control of fissionable materials in non-military applications. The meeting took place in Stockholm, 12-16 October 1978. Originally published in 1979, this book on nuclear energy and nuclear weapon proliferation contains the papers presented at the symposium and reflects the discussions at the meeting.
