handbook provides an overview
on wood science and
technology of unparalleled
comprehensiveness and
international validity. It
describes the fundamental
wood biology, chemistry and
physics, as well as structure-
property relations of wood and
wood-based materials. The
different aspects and steps of
wood processing are presented
in detail from both a
fundamental technological
perspective and their
realisation in industrial
contexts. The discussed
industrial processes extend
beyond sawmilling and the
manufacturing of adhesively
bonded wood products to the
processing of the various wood-
based materials, including pulp
and paper, natural fibre
materials and aspects of bio-
refinery. Core concepts of
wood applications, quality and
life cycle assessment of this
important natural resource are
presented. The book concludes
with a useful compilation of
fundamental material
parameters and data as well as

a glossary of terms in accordance with the most important industry standards. Written and edited by a truly international team of experts from academia, research institutes and industry, thoroughly reviewed by external colleagues, this handbook is well-attuned to educational demands, as well as providing a summary of state-of-the-art research trends and industrial requirements. It is an invaluable resource for all professionals in research and development, and engineers in practise in the field of wood science and technology.
